

WEAPONS

This page covers weapon categories, proficiency, weapon qualities, and the full catalog of weapon descriptions. See [Wealth, Money & Special Materials](#) for currency and crafting materials, [Armor](#) for armor and shields, and [Goods & Services](#) for adventuring gear.

WEAPONS

From the common longsword to the exotic dwarven urgrosh, weapons come in a wide variety of shapes and sizes.

All weapons deal hit point damage. This damage is subtracted from the current hit points of any creature struck by the weapon. When the result of the die roll to make an attack is a natural 20 (that is, the die actually shows a 20), this is known as a critical threat (although some weapons can score a critical threat on a roll of less than 20). If a critical threat is scored, another attack roll is made, using the same modifiers as the original attack roll. If this second attack roll is equal or greater than the target's AC, the hit becomes a critical hit, dealing additional damage.

Weapons are grouped into several interlocking sets of categories. These categories pertain to what training is needed to become proficient in a weapon's use (simple, martial, or exotic), the weapon's usefulness either in close combat (melee) or at a distance (ranged, which includes both thrown and projectile weapons), its relative encumbrance (light, one-handed, or two-handed), and its size (Small, Medium, or Large).

SIMPLE, MARTIAL, AND EXOTIC WEAPONS

Anybody but a druid, monk, or wizard is proficient with all simple weapons. Barbarians, fighters, paladins, and rangers are proficient with all simple and all martial weapons. Characters of other classes are proficient with an assortment of simple weapons and possibly some martial or even exotic weapons. All characters are proficient with unarmed strikes and any natural weapons possessed by their race. A character who uses a weapon with which he is not proficient takes a -4 penalty on attack rolls.

MELEE AND RANGED WEAPONS

Melee weapons are used for making melee attacks, though some of them can be thrown as well. Ranged weapons are thrown weapons or projectile weapons that are not effective in melee.

Reach Weapons

Glaives, guisarmes, lances, longspears, ranseurs, and whips are reach weapons. A reach weapon is a melee weapon that allows its wielder to strike at targets that aren't adjacent to him. Most reach weapons double the wielder's natural reach, meaning that a typical Small or Medium wielder of such a weapon can attack a creature 10 feet away, but not a creature in an adjacent square. A typical Large character wielding a reach weapon of the appropriate size can attack a creature 15 or 20 feet away, but not adjacent creatures or creatures up to 10 feet away.

Double Weapons

Dire flails, dwarven urgroshes, gnome hooked hammers, orc double axes, quarterstaves, and two-bladed swords are double weapons. A character can fight with both ends of a double weapon as if fighting with two weapons, but he incurs all the normal attack penalties associated with two-weapon combat, just as though the character were wielding a one-handed weapon and a light weapon.

The character can also choose to use a double weapon two-handed, attacking with only one end of it. A creature wielding a double weapon in one hand can't use it as a double weapon—only one end of the weapon can be used in any given round.

Thrown Weapons

Daggers, clubs, shortspears, spears, darts, javelins, throwing axes, light hammers, tridents, shuriken, and nets are thrown weapons. The wielder applies his Strength modifier to damage dealt by thrown weapons (except for splash weapons). It is possible to throw a weapon that isn't designed to be thrown (that is, a melee weapon that doesn't have a numeric entry in the Range column on Table: Weapons), and a character who does so takes a -4 penalty on the attack roll. Throwing a light or one-handed weapon is a standard action, while throwing a two-handed weapon is a full-round action. Regardless of the type of weapon, such an attack scores a threat only on a natural roll of 20 and deals double damage on a critical hit. Such a weapon has a range increment of 10 feet.

Projectile Weapons

Blowguns, light crossbows, slings, heavy crossbows, shortbows, composite shortbows, longbows, composite longbows, halfling sling staves, hand crossbows, and repeating crossbows are projectile weapons. Most projectile weapons require two hands to use (see specific weapon descriptions). A character gets no Strength bonus on damage rolls with a projectile weapon unless it's a specially built composite shortbow or longbow, or a sling. If the character has a penalty for low Strength, apply it to damage rolls when he uses a bow or a sling.

Ammunition

Projectile weapons use ammunition: arrows (for bows), bolts (for crossbows), darts (for blowguns), or sling bullets (for slings and halfling sling staves). When using a bow, a character can draw ammunition as a free action; crossbows and slings require an action for reloading (as noted in their descriptions). Generally speaking, ammunition that hits its target is destroyed or rendered useless, while ammunition that misses has a 50% chance of being destroyed or lost.

Although they are thrown weapons, shuriken are treated as ammunition for the purposes of drawing them, crafting masterwork or otherwise special versions of them, and what happens to them after they are thrown.

LIGHT, ONE-HANDED, AND TWO-HANDED MELEE WEAPONS

This designation is a measure of how much effort it takes to wield a weapon in combat. It indicates whether a melee weapon, when wielded by a character of the weapon's size category, is considered a light weapon, a one-handed weapon, or a two-handed weapon.

Light

A light weapon is used in one hand. It is easier to use in one's off hand than a one-handed weapon is, and can be used while grappling (see Combat). Add the wielder's Strength modifier to damage rolls for melee attacks with a light weapon if it's used in the primary hand, or half the wielder's Strength bonus if it's used in the off hand. Using two hands to wield a light weapon gives no advantage on damage; the Strength bonus applies as though the weapon were held in the wielder's primary hand only.

An unarmed strike is always considered a light weapon.

One-Handed

A one-handed weapon can be used in either the primary hand or the off hand. Add the wielder's Strength bonus to damage rolls for melee attacks with a one-handed weapon if it's used in the primary hand, or 1/2 his Strength bonus if it's used in the off hand. If a one-handed weapon is wielded with two hands during melee combat, add 1-1/2 times the character's Strength bonus to damage rolls.

Two-Handed

Two hands are required to use a two-handed melee weapon effectively. Apply 1-1/2 times the character's Strength bonus to damage rolls for melee attacks with such a weapon.

WEAPON SIZE

Every weapon has a size category. This designation indicates the size of the creature for which the weapon was designed.

A weapon's size category isn't the same as its size as an object. Instead, a weapon's size category is keyed to the size of the intended wielder. In general, a light weapon is an object two size categories smaller than the wielder, a one-handed weapon is an object one size category smaller than the wielder, and a two-handed weapon is an object of the same size category as the wielder.

Inappropriately Sized Weapons

A creature can't make optimum use of a weapon that isn't properly sized for it. A cumulative -2 penalty applies on attack rolls for each size category of difference between the size of its intended wielder and the size of its actual wielder. If the creature isn't proficient with the weapon, a -4 nonproficiency penalty also applies.

The measure of how much effort it takes to use a weapon (whether the weapon is designated as a light, one-handed, or two-handed weapon for a particular wielder) is altered by one step for each size category of difference between the wielder's size and the size of the creature for which the weapon was designed. For example, a Small creature would wield a Medium one-handed weapon as a two-handed weapon. If a weapon's designation would be changed to something other than light, one-handed, or two-handed by this alteration, the creature can't wield the weapon at all.

IMPROVISED WEAPONS

Sometimes objects not crafted to be weapons nonetheless see use in combat. Because such objects are not designed for this use, any creature that uses an improvised weapon in combat is considered to be nonproficient with it and takes a -4 penalty on attack rolls made with that object. To determine the size category and appropriate damage for an improvised weapon, compare its relative size and damage potential to the weapon list to find a reasonable match. An improvised weapon scores a threat on a natural roll of 20 and deals double damage on a critical hit. An improvised thrown weapon has a range increment of 10 feet.

WEAPON QUALITIES

Here is the format for weapon entries (given as column headings on Table: Weapons).

Cost

This value is the weapon's cost in gold pieces (gp) or silver pieces (sp). The cost includes miscellaneous gear that goes with the weapon, such as a scabbard or quiver.

This cost is the same for a Small or Medium version of the weapon. A Large version costs twice the listed price.

Dmg

These columns give the damage dealt by the weapon on a successful hit. The column labeled "Dmg (S)" is for Small weapons. The column labeled "Dmg (M)" is for Medium weapons. If two damage ranges are given, then the weapon is a double weapon. Use the second damage figure given for the double weapon's extra attack. Table: Tiny and Large Weapon Damage gives weapon damage values for Tiny and Large weapons.

Table: Tiny and Large Weapon Damage

MEDIUM WEAPON DAMAGE	TINY WEAPON DAMAGE	LARGE WEAPON DAMAGE
1d2	–	1d3
1d3	1	1d4
1d4	1d2	1d6
1d6	1d3	1d8
1d8	1d4	2d6
1d10	1d6	2d8
1d12	1d8	3d6
2d4	1d4	2d6
2d6	1d8	3d6
2d8	1d10	3d8
2d10	2d6	4d8

Critical

The entry in this column notes how the weapon is used with the rules for critical hits. When your character scores a critical hit, roll the damage two, three, or four times, as indicated by its critical multiplier (using all applicable modifiers on each roll), and add all the results together.

Extra damage over and above a weapon's normal damage is not multiplied when you score a critical hit.

× 2 The weapon deals double damage on a critical hit.

× 3 The weapon deals triple damage on a critical hit.

× 3/× 4 One head of this double weapon deals triple damage on a critical hit. The other head deals quadruple damage on a critical hit.

× 4 The weapon deals quadruple damage on a critical hit.

19-20/× 2 The weapon scores a threat on a natural roll of 19 or 20 (instead of just 20) and deals double damage on a critical hit.

18-20/× 2 The weapon scores a threat on a natural roll of 18, 19, or 20 (instead of just 20) and deals double damage on a critical hit.

Range

Any attack at more than this distance is penalized for range. Beyond this range, the attack takes a cumulative -2 penalty for each full range increment (or fraction thereof) of distance to the target. For example, a dagger (with a range of 10 feet) thrown at a target that is 25 feet away would incur a -4 penalty. A thrown weapon has a maximum range of five range increments. A projectile weapon can shoot to 10 range increments.

Weight

This column gives the weight of a Medium version of the weapon. Halve this number for Small weapons and double it for Large weapons. Some weapons have a special weight. See the weapon's description for details.

Type

Weapons are classified according to the type of damage they deal: B for bludgeoning, P for piercing, or S for slashing. Some monsters may be resistant or immune to attacks from certain types of weapons.

Some weapons deal damage of multiple types. If a weapon causes two types of damage, the type it deals is not half one type and half another; all damage caused is of both types. Therefore, a creature would have to be immune to both types of damage to ignore any of the damage caused by such a weapon.

In other cases, a weapon can deal either of two types of damage. In a situation where the damage type is significant, the wielder can choose which type of damage to deal with such a weapon.

Special

Some weapons have special features in addition to those noted in their descriptions.

Brace

If you use a readied action to set a brace weapon against a charge, you deal double damage on a successful hit against a charging character (see Combat).

Disarm

When you use a disarm weapon, you get a +2 bonus on Combat Maneuver Checks to disarm an enemy.

Double

You can use a double weapon to fight as if fighting with two weapons, but if you do, you incur all the normal attack penalties associated with fighting with two weapons, just as if you were using a one-handed weapon and a light weapon. You can choose to wield one end of a double weapon two-handed, but it cannot be used as a double weapon when wielded in this way—only one end of the weapon can be used in any given round.

Monk

A monk weapon can be used by a monk to perform a flurry of blows (see Classes).

Nonlethal

These weapons deal nonlethal damage (see Combat).

Reach

You use a reach weapon to strike opponents 10 feet away, but you can't use it against an adjacent foe.

Trip

You can use a trip weapon to make trip attacks. If you are tripped during your own trip attempt, you can drop the weapon to avoid being tripped.

WEAPON DESCRIPTIONS

Table: Weapons

SIMPLE WEAPONS	COST	DMG (S)	DMG (M)	CRITICAL	RANGE	WEIGHT1	TYPE2	SPECIAL
<i>Unarmed Attacks</i>								
Gauntlet	2 gp	1d2	1d3	×2	–	1 lb.	B	–
Unarmed strike	–	1d2	1d3	×2	–	–	B	nonlethal
<i>Light Melee Weapons</i>								
Dagger	2 gp	1d3	1d4	19–20/ ×2	10 ft.	1 lb.	P or S	–
Dagger, punching	2 gp	1d3	1d4	×3	–	1 lb.	P	–
Gauntlet, spiked	5 gp	1d3	1d4	×2	–	1 lb.	P	–
Mace, light	5 gp	1d4	1d6	×2	–	4 lbs.	B	–

Sling	–	1d3	1d4	×2	50 ft.	–	B	–
Bullets, sling (10)	1 sp	–	–	–	–	5 lbs.	–	–
Martial Weapons	Cost	Dmg (S)	Dmg (M)	Critical	Range	Weight1	Type2	Special
<i>Light Melee Weapons</i>								
Axe, throwing	8 gp	1d4	1d6	×2	10 ft.	2 lbs.	S	–
Hammer, light	1 gp	1d3	1d4	×2	20 ft.	2 lbs.	B	–
Handaxe	6 gp	1d4	1d6	×3	–	3 lbs.	S	–
Kukri	8 gp	1d3	1d4	18–20/ ×2	–	2 lbs.	S	–

Arrows

An arrow used as a melee weapon is treated as a light improvised weapon (-4 penalty on attack rolls) and deals damage as a dagger of its size (critical multiplier ×2). Arrows come in a leather quiver that holds 20 arrows.

Axe, Orc Double

A cruel weapon with blades placed at opposite ends of a long haft, an orc double axe is a double weapon.

Battleaxe

The handle of this axe is long enough that you can wield it one-handed or two-handed. The head may have one blade or two, with blade shapes ranging from half-moons to squared edges like narrower versions of woodcutting axes. The wooden haft may be protected and strengthened with metal bands called langets.

Blowgun

Blowguns are generally used to deliver debilitating (but rarely fatal) poisons from a distance. They are nearly silent when fired. For a list of appropriate poisons, see Poison.

Blowgun Darts

The thin, light darts used in a blowgun are usually made of hardwood with a stabilizing fletching of down or fur. A dart is usually loaded from the back end just before firing.

Bolas

A bolas is a pair of weights, connected by a thin rope or cord. You can use this weapon to make a ranged trip attack against an opponent. You can't be tripped during your own trip attempt when using a bolas.

Bolts

A crossbow bolt used as a melee weapon is treated as a light improvised weapon (-4 penalty on attack rolls) and deals damage as a dagger of its size (crit ×2). Bolts come in a case or quiver that holds 10 bolts (or 5, for a repeating crossbow).

Bullets, Sling

Bullets are shaped metal balls, designed to be used by a sling or halfling sling staff. Bullets come in a leather pouch that holds 10 bullets.

Chain, Spiked

A spiked chain is about 4 feet in length, covered in wicked barbs. You can use the Weapon Finesse feat to apply your Dexterity modifier instead of your Strength modifier to attack rolls with a spiked chain sized for you, even though it isn't a light weapon.

Club

This weapon is usually just a shaped piece of wood, sometimes with a few nails or studs embedded in it.

Crossbow, Hand

You can draw a hand crossbow back by hand. Loading a hand crossbow is a move action that provokes attacks of opportunity.

You can shoot, but not load, a hand crossbow with one hand at no penalty. You can shoot a hand crossbow with each hand, but you take a penalty on attack rolls as if attacking with two light weapons.

Crossbow, Heavy

You draw a heavy crossbow back by turning a small winch. Loading a heavy crossbow is a full-round action that provokes attacks of opportunity.

Normally, operating a heavy crossbow requires two hands. However, you can shoot, but not load, a heavy crossbow with one hand at a -4 penalty on attack rolls. You can shoot a heavy crossbow with each hand, but you take a penalty on attack rolls as if attacking with two one-handed weapons. This penalty is cumulative with the penalty for one-handed firing.

Crossbow, Light

You draw a light crossbow back by pulling a lever. Loading a light crossbow is a move action that provokes attacks of opportunity.

Normally, operating a light crossbow requires two hands. However, you can shoot, but not load, a light crossbow with one hand at a -2 penalty on attack rolls. You can shoot a light crossbow with each hand, but you take a penalty on attack rolls as if attacking with two light weapons. This penalty is cumulative with the penalty for one-handed firing.

Crossbow, Repeating Heavy

The repeating crossbow (whether heavy or light) holds 5 crossbow bolts. As long as it holds bolts, you can reload it by pulling the reloading lever (a free action). Loading a new case of 5 bolts is a full-round action that provokes attacks of opportunity.

You can fire a repeating crossbow with one hand or fire a repeating crossbow in each hand in the same manner as you would a normal crossbow of the same size. However, you must fire the weapon with two hands in order to use the reloading lever, and you must use two hands to load a new case of bolts.

Crossbow, Repeating Light

The repeating crossbow (whether heavy or light) holds 5 crossbow bolts. As long as it holds bolts, you can reload it by pulling the reloading lever (a free action). Loading a new case of 5 bolts is a full-round action that provokes attacks of opportunity.

You can fire a repeating crossbow with one hand or fire a repeating crossbow in each hand in the same manner as you would a normal crossbow of the same size. However, you must fire the weapon with two hands in order to use the reloading lever, and you must use two hands to load a new case of bolts.

Curve Blade, Elven

Essentially a longer version of a scimitar, but with a thinner blade, the elven curve blade is exceptionally rare. You receive a +2 circumstance bonus to your Combat Maneuver Defense whenever a foe attempts to sunder your elven curve blade due to its flexible metal.

You can use the Weapon Finesse feat to apply your Dexterity modifier instead of your Strength modifier to attack rolls with an elven curve blade sized for you, even though it isn't a light weapon.

Dagger

A dagger has a blade that is about 1 foot in length. You get a +2 bonus on Sleight of Hand skill checks made to conceal a dagger on your body (see Using Skills).

Dagger, Punching

A punching dagger's blade is attached to a horizontal handle that projects out from the fist when held.

Dart

This thrown weapon is larger than an arrow and shorter than a javelin, with a weighted tip and a shorter range than a javelin. Most darts are wooden shafts with a thick metal point.

Falchion

This sword has one curved, sharp edge like a scimitar, with the back edge unsharpened and either flat or slightly curved. Its weight is greater toward the end, making it better for chopping rather than stabbing.

Flail

A flail consists of a spiked metal ball, connected to a handle by a sturdy chain.

Flail, Dire

A dire flail consists of two spheres of spiked iron dangling from chains at opposite ends of a long haft.

Flail, Heavy

Similar to a flail, a heavy flail has a larger metal ball and a longer handle.

Gauntlet

This metal glove lets you deal lethal damage rather than nonlethal damage with unarmed strikes. A strike with a gauntlet is otherwise considered an unarmed attack. The cost and weight given are for a single gauntlet. Medium and heavy armors (except breastplate) come with gauntlets. Your opponent cannot use a disarm action to disarm you of gauntlets.

Gauntlet, Spiked

The cost and weight given are for a single gauntlet. An attack with a spiked gauntlet is considered an armed attack. Your opponent cannot use a disarm action to disarm you of spiked gauntlets.

Glaive

A glaive is a simple blade, mounted to the end of a pole about 7 feet in length.

Greataxe

This two-handed battle axe is heavy enough that you can't wield it with one hand. The head may have one blade or two, and may be "bearded" (meaning hooked or trailing at the bottom) to increase cleaving power and help pull down enemy shields. The haft is usually 3 to 4 feet long.

Greatclub

This larger, bulkier version of the common club is heavy enough that you can't wield it with one hand. It may be ornate and carved, reinforced with metal, or a simple branch from a tree. Like simple clubs, greatclubs have many names, such as cudgels, bludgeons, shillelaghs, and more.

Greatsword

This immense two-handed sword is about 5 feet in length.

Guisarme

A guisarme is an 8-foot-long shaft with a blade and a hook mounted at the tip.

Halberd

A halberd is similar to a 5-foot-long spear, but it also has a small, axe-like head mounted near the tip.

Hammer, Gnome Hooked

A gnome hooked hammer is a double weapon—an ingenious tool with a hammer head at one end of its haft and a long, curved pick at the other. The hammer's blunt head is a bludgeoning weapon that deals 1d6 points of damage (crit ×3). Its hook is a piercing weapon that deals 1d4 points of damage (crit ×4). You can use either head as the primary weapon. Gnomes treat hooked hammers as martial weapons.

Handaxe

This one-handed axe is short (roughly 1 foot long) and designed for use with one hand. Unlike throwing axes, it is not well balanced for a graceful tumbling motion, and is instead heavier at its head. Tomahawks, war hatchets, and other such names usually refer to hand axes.

Heavy Pick

This variant of the light pick has a longer handle and can be used with one or two hands. It is a common, inexpensive weapon for mounted soldiers since it can be used effectively from horseback.

Javelin

A javelin is a thin throwing spear . Since it is not designed for melee, you are treated as nonproficient with it and take a -4 penalty on attack rolls if you use a javelin as a melee weapon.

Kama

Similar to a sickle, a kama is a short, curved blade attached to a simple handle.

Kukri

A kukri is a curved blade, about 1 foot in length.

Lance

A lance deals double damage when used from the back of a charging mount. While mounted, you can wield a lance with one hand.

Light Hammer

A lighter version of a warhammer, this weapon usually has a sleek metal head with one striking surface.

Light Pick

This weapon, adapted from the pickaxe tool, has a head with a slightly curved, armor-piercing spike and a hammerlike counterweight.

Longbow

At almost 5 feet in height, a longbow is made up of one solid piece of carefully curved wood. You need two hands to use a bow, regardless of its size. A longbow is too unwieldy to use while you are mounted. If you have a penalty for low Strength, apply it to damage rolls when you use a longbow. If you have a Strength bonus, you can apply it to damage rolls when you use a composite longbow (see below), but not when you use a regular longbow.

Longbow, Composite

You need at least two hands to use a bow, regardless of its size. You can use a composite longbow while mounted. All composite bows are made with a particular strength rating (that is, each requires a minimum Strength modifier to use with proficiency). If your Strength bonus is less than the strength rating of the composite bow, you can't effectively use it, so you take a -2 penalty on attacks with it. The default composite longbow requires a Strength modifier of +0 or higher to use with proficiency. A composite longbow can be made with a high strength rating to take advantage of an above-average Strength score; this feature allows you to add your Strength bonus to damage, up to the maximum bonus indicated for the bow. Each point of Strength bonus granted by the bow adds 100 gp to its cost. If you have a penalty for low Strength, apply it to damage rolls when you use a composite longbow.

For purposes of Weapon Proficiency and similar feats, a composite longbow is treated as if it were a longbow.

Longspear

A longspear is about 8 feet in length.

Longsword

This sword is about 3-1/2 feet in length.

Mace

A mace is made up of an ornate metal head attached to a simple wooden or metal shaft.

Mace, Heavy

A heavy mace has a larger head and a longer handle than a normal mace.

Morningstar

A morningstar is a spiked metal ball, affixed to the top of a long handle.

Net

A net is used to entangle enemies. When you throw a net, you make a ranged touch attack against your target. A net's maximum range is 10 feet. If you hit, the target is entangled. An entangled creature takes a -2 penalty on attack rolls and a -4 penalty on Dexterity, can move at only half speed, and cannot charge or run. If you control the trailing rope by succeeding on an opposed Strength check while holding it, the entangled creature can move only within the limits that the rope allows. If the entangled creature attempts to cast a spell, it must make a concentration check with a DC of 15 + the spell's level or be unable to cast the spell.

An entangled creature can escape with a DC 20 Escape Artist check (a full-round action). The net has 5 hit points and can be burst with a DC 25 Strength check (also a full-round action). A net is useful only against creatures within one size category of you.

A net must be folded to be thrown effectively. The first time you throw your net in a fight, you make a normal ranged touch attack roll. After the net is unfolded, you take a -4 penalty on attack rolls with it. It takes 2 rounds for a proficient user to fold a net and twice that long for a nonproficient one to do so.

Nunchaku

A nunchaku is made up of two wooden or metal bars connected by a small length of rope or chain.

Quarterstaff

A quarterstaff is a simple piece of wood, about 5 feet in length.

Ranseur

Similar in appearance to a trident, a ranseur has a single spear at its tip, flanked by a pair of short, curving blades.

Rapier

You can use the Weapon Finesse feat to apply your Dexterity modifier instead of your Strength modifier to attack rolls with a rapier sized for you, even though it isn't a light weapon. You can't wield a rapier in two hands in order to apply 1-1/2 times your Strength bonus to damage.

Sai

A sai is a metal spike flanked by a pair of prongs used to trap an enemy's weapon. With a sai, you get a +2 bonus on Combat Maneuver Checks to sunder an enemy's weapon. Though pointed, a sai is used primarily to bludgeon foes and to disarm weapons.

Sap

This weapon consists of a soft wrapping around a hard, dense core, typically a leather sheath around a lead rod. The head is wider than the handle and designed to spread out the force of the blow, making it less likely to draw blood or break bones.

Scimitar

This curved sword is shorter than a longsword and longer than a shortsword. Only the outer edge is sharp, and the back is flat, giving the blade a triangular cross-section.

Scythe

This weapon consists of a long wooden shaft with protruding handles and a sharp curved blade set at a right angle. Derived from a farm tool used to mow down crops, a scythe requires two hands to use, and is unwieldy but capable of inflicting grievous wounds. Its connotations as a symbol of death due to its association with reaping also make the scythe a particularly intimidating weapon.

Shield, Heavy

You can bash with a shield instead of using it for defense.

Shield, Light

You can bash with a shield instead of using it for defense.

Shortbow

A shortbow is made up of one piece of wood, about 3 feet in length. You need two hands to use a bow, regardless of its size. You can use a shortbow while mounted. If you have a penalty for low Strength, apply it to damage rolls when you use a shortbow. If you have a bonus for high Strength, you can apply it to damage rolls when you use a composite shortbow (see below), but not a regular shortbow.

Shortbow, Composite

You need at least two hands to use a bow, regardless of its size. You can use a composite shortbow while mounted. All composite bows are made with a particular strength rating (that is, each requires a minimum Strength modifier to use with proficiency). If your Strength bonus is lower than the strength rating of the composite bow, you can't effectively use it, so you take a -2 penalty on attacks with it. The default composite shortbow requires a Strength modifier of +0 or higher to use with proficiency. A composite shortbow can be made with a high strength rating to take advantage of an above-average Strength score; this feature allows you to add your Strength bonus to damage, up to the maximum bonus indicated for the bow. Each point of Strength bonus granted by the bow adds 75 gp to its cost. If you have a penalty for low Strength, apply it to damage rolls when you use a composite shortbow.

For purposes of Weapon Proficiency, Weapon Focus, and similar feats, a composite shortbow is treated as if it were a shortbow.

Shortspear

A shortspear is about 3 feet in length, making it a suitable thrown weapon.

Shortsword

This sword is about 2 feet in length.

Shuriken

A shuriken is a small piece of metal with sharpened edges, designed for throwing. A shuriken can't be used as a melee weapon. Although they are thrown weapons, shuriken are treated as ammunition for the purposes of drawing them, crafting masterwork or otherwise special versions of them, and what happens to them after they are thrown.

Siangham

This weapon is a handheld shaft fitted with a pointed tip for stabbing foes.

Sickle

Originating as a farming tool used for reaping grain, this one-handed weapon has a blade with a strong curve that can easily catch an opponent's limb or armor. Its blade can be either smooth or serrated, and some fighting sickles are sharpened on both sides near the point, making it easier to hook into an opponent's flesh.

Sling

A sling is little more than a leather cup attached to a pair of strings. Your Strength modifier applies to damage rolls when you use a sling, just as it does for thrown weapons. You can fire, but not load, a sling with one hand. Loading a sling is a move action that requires two hands and provokes attacks of opportunity.

You can hurl ordinary stones with a sling, but stones are not as dense or as round as bullets. Thus, such an attack deals damage as if the weapon were designed for a creature one size category smaller than you and you take a -1 penalty on attack rolls.

Sling Staff, Halfling

Made from a specially designed sling attached to a short club, a halfling sling staff can be used by a proficient wielder to devastating effect. Your Strength modifier applies to damage rolls when you use a halfling sling staff, just as it does for thrown weapons. You can fire, but not load, a halfling sling staff with one hand. Loading a halfling sling staff is a move action that requires two hands and provokes attacks of opportunity.

You can hurl ordinary stones with a halfling sling staff, but stones are not as dense or as round as bullets. Thus, such an attack deals damage as if the weapon were designed for a creature one size category smaller than you and you take a -1 penalty on attack rolls.

A halfling sling staff can be used as a simple weapon that deals bludgeoning damage equal to that of a club of its size. Halflings treat halfling sling staves as martial weapons.

Spear

A spear is 5 feet in length and can be thrown.

Spiked Armor

You can outfit your armor with spikes, which can deal damage in a grapple or as a separate attack. See Armor, below, for details.

Spiked Shield, Heavy

You can bash with a spiked shield instead of using it for defense.

Spiked Shield, Light

You can bash with a spiked shield instead of using it for defense.

Starknife

From a central metal ring, four tapering metal blades extend like points on a compass rose. A wielder can stab with the starknife or throw it.

Strike, Unarmed

A Medium character deals 1d3 points of nonlethal damage with an unarmed strike. A Small character deals 1d2 points of nonlethal damage. A monk or any character with the Improved Unarmed Strike feat can deal lethal or nonlethal damage with unarmed strikes, at his discretion. The damage from an unarmed strike is considered weapon damage for the purposes of effects that give you a bonus on weapon damage rolls.

An unarmed strike is always considered a light weapon. Therefore, you can use the Weapon Finesse feat to apply your Dexterity modifier instead of your Strength modifier to attack rolls with an unarmed strike. Unarmed strikes do not count as natural weapons (see Combat).

Sword, Bastard

A bastard sword is about 4 feet in length, making it too large to use in one hand without special training; thus, it is an exotic weapon. A character can use a bastard sword two-handed as a martial weapon.

Sword, Two-Bladed

A two-bladed sword is a double weapon—twin blades extend from either side of a central, short haft, allowing the wielder to attack with graceful but deadly flourishes.

Throwing Axe

This one-handed axe is small and perfectly balanced for throwing, and can be used as a melee weapon. Throwing axes have a variety of alternative names, including franciscas, tomahawks, and more. The axe is normally gripped by the haft and thrown overhand, making one complete rotation in the air before biting into the target with the axe head.

Trident

A trident has three metal prongs at end of a 4-foot-long shaft. This weapon can be thrown.

Urgrosh, Dwarven

A dwarven urgrosh is a double weapon—an axe head and a spear point on opposite ends of a long haft. The urgrosh's axe head is a slashing weapon that deals 1d8 points of damage. Its spear head is a piercing weapon that deals 1d6 points of damage. You can use either head as the primary weapon. The other becomes the off-hand weapon. If you use an urgrosh against a charging character, the spear head is the part of the weapon that deals damage. Dwarves treat dwarven urgroshes as martial weapons.

Waraxe, Dwarven

A dwarven waraxe has a large, ornate head mounted to a thick handle, making it too large to use in one hand without special training; thus, it is an exotic weapon. A Medium character can use a dwarven waraxe two-handed as a martial weapon, or a Large creature can use it one-handed in the same way. A dwarf treats a dwarven waraxe as a martial weapon even when using it in one hand.

Warhammer

This weapon consists of a wooden haft and a heavy, metal head. The head may be single (like a carpenter's hammer) or double (like a sledgehammer). The haft is long enough that you may wield it one- or two-handed. Though heavy and relatively slow to wield, warhammers are capable of delivering immense blows, crushing armor and flesh alike.

Whip

A whip deals no damage to any creature with an armor bonus of +1 or higher or a natural armor bonus of +3 or higher. The whip is treated as a melee weapon with 15-foot reach, though you don't threaten the area into which you can make an attack. In addition, unlike most other weapons with reach, you can use it against foes anywhere within your reach (including adjacent foes).

Using a whip provokes an attack of opportunity, just as if you had used a ranged weapon.

You can use the Weapon Finesse feat to apply your Dexterity modifier instead of your Strength modifier to attack rolls with a whip sized for you, even though it isn't a light weapon.

MASTERWORK WEAPONS

A masterwork weapon is a finely crafted version of a normal weapon. Wielding it provides a +1 enhancement bonus on attack rolls.

You can't add the masterwork quality to a weapon after it is created; it must be crafted as a masterwork weapon (see the Craft skill). The masterwork quality adds 300 gp to the cost of a normal weapon (or 6 gp to the cost of a single unit of ammunition). Adding the masterwork quality to a double weapon costs twice the normal increase (+600 gp).

Masterwork ammunition is damaged (effectively destroyed) when used. The enhancement bonus of masterwork ammunition does not stack with any enhancement bonus of the projectile weapon firing it.

All magic weapons are automatically considered to be of masterwork quality. The enhancement bonus granted by the masterwork quality doesn't stack with the enhancement bonus provided by the weapon's magic.

Even though some types of armor and shields can be used as weapons, you can't create a masterwork version of such an item that confers an enhancement bonus on attack rolls. Instead, masterwork armor and shields have lessened armor check penalties.
