

SPECIAL ABILITIES

This page covers the two categories of special ability found throughout the Pathfinder rules: extraordinary, spell-like, and supernatural abilities, and the various afflictions (curses, diseases, and poisons) that can affect a character. See Conditions for the standardized status effects (blinded, prone, staggered, and so on) referenced throughout the rules.

The following special abilities include rules commonly used by a number of creatures, spells, and traps.

EXTRAORDINARY ABILITIES

Extraordinary abilities are nonmagical. They are, however, not something that just anyone can do or even learn to do without extensive training. Effects or areas that suppress or negate magic have no effect on extraordinary abilities.

SPELL-LIKE ABILITIES

Spell-like abilities, as the name implies, are magical abilities that are very much like spells. Spell-like abilities are subject to spell resistance and *dispel magic*. They do not function in areas where magic is suppressed or negated (such as an *antimagic field*). Spell-like abilities can be dispelled but they cannot be counterspelled or used to counterspell.

SUPERNATURAL ABILITIES

Supernatural abilities are magical but not spell-like. Supernatural abilities are not subject to spell resistance and do not function in areas where magic is suppressed or negated (such as an *antimagic field*). A supernatural ability's effect cannot be dispelled and is not subject to counterspells. See Table: Special Ability Types for a summary of the types of special abilities.

TABLE: SPECIAL ABILITY TYPES

	Extraordinary	Spell-Like	Supernatural
--	---------------	------------	--------------

	—		—
--	---	--	---

Dispell	No	Yes	No
---------	----	-----	----

Spell resistance	No	Yes	No
------------------	----	-----	----

Antimagic field	No	Yes	Yes
-----------------	----	-----	-----

Attack of opportunity	No	Yes	No
-----------------------	----	-----	----

Dispel : Can *dispel magic* and similar spells dispel the effects of abilities of that type?

Spell Resistance : Does spell resistance protect a creature from these abilities?

Antimagic Field : Does an *antimagic field* or similar magic suppress the ability?

Attack of Opportunity : Does using the ability provoke attacks of opportunity the way that casting a spell does?

ABILITY SCORE BONUSES

Some spells and abilities increase your ability scores. Ability score increases with a duration of 1 day or less give only temporary bonuses. For every two points of increase to a single ability, apply a +1 bonus to the skills and statistics listed with the relevant ability.

STRENGTH

Temporary increases to your Strength score give you a bonus on Strength-based skill checks, melee attack rolls, and weapon damage rolls (if they rely on Strength). The bonus also applies to your Combat Maneuver Bonus (if you are Small or larger) and to your Combat Maneuver Defense.

DEXTERITY

Temporary increases to your Dexterity score give you a bonus on Dexterity-based skill checks, ranged attack rolls, initiative checks, and Reflex saving throws. The bonus also applies to your Armor Class, your Combat Maneuver Bonus (if you are Tiny or smaller), and your Combat Maneuver Defense.

CONSTITUTION

Temporary increases to your Constitution score give you a bonus on your Fortitude saving throws. In addition, multiply your total Hit Dice by this bonus and add that amount to your current and total hit points. When the bonus ends, remove this total from your current and total hit points.

INTELLIGENCE

Temporary increases to your Intelligence score give you a bonus on Intelligence-based skill checks. This bonus also applies to any spell DCs based on Intelligence.

WISDOM

Temporary increases to your Wisdom score give you a bonus on Wisdom-based skill checks and Will saving throws. This bonus also applies to any spell DCs based on Wisdom.

CHARISMA

Temporary increases to your Charisma score give you a bonus on Charisma-based skill checks. This bonus also applies to any spell DCs based on Charisma and the DC to resist your channeled energy.

PERMANENT BONUSES

Ability bonuses with a duration greater than 1 day actually increase the relevant ability score after 24 hours. Modify all skills and statistics related to that ability. This might cause you to gain skill points, hit points, and other bonuses. These bonuses should be noted separately in case they are removed.

ABILITY SCORE DAMAGE, PENALTY, AND DRAIN

Diseases, poisons, spells, and other abilities can all deal damage directly to your ability scores. This damage does not actually reduce an ability, but it does apply a penalty to the skills and statistics that are based on that ability.

For every 2 points of damage you take to a single ability, apply a -1 penalty to skills and statistics listed with the relevant ability. If the amount of ability damage you have taken equals or exceeds your ability score, you immediately fall unconscious until the damage is less than your ability score. The only exception to this is your Constitution score. If the damage to your Constitution is equal to or greater than your Constitution score, you die. Unless otherwise noted, damage to your ability scores is healed at the rate of 1 per day to each ability score that has been damaged. Ability damage can be healed through the use of spells, such as *lesser restoration*.

Some spells and abilities cause you to take an ability penalty for a limited amount of time. While in effect, these penalties function just like ability damage, but they cannot cause you to fall unconscious or die. In essence, penalties cannot decrease your ability score to less than 1.

STRENGTH

Damage to your Strength score causes you to take penalties on Strength-based skill checks, melee attack rolls, and weapon damage rolls (if they rely on Strength). The penalty also applies to your Combat Maneuver Bonus (if you are Small or larger) and your Combat Maneuver Defense.

DEXTERITY

Damage to your Dexterity score causes you to take penalties on Dexterity-based skill checks, ranged attack rolls, initiative checks, and Reflex saving throws. The penalty also applies to your Armor Class, your Combat Maneuver Bonus (if you are Tiny or smaller), and to your Combat Maneuver Defense.

CONSTITUTION

Damage to your Constitution score causes you to take penalties on your Fortitude saving throws. In addition, multiply your total Hit Dice by this penalty and subtract that amount from your current and total hit points. Lost hit points are restored when the damage to your Constitution is healed.

INTELLIGENCE

Damage to your Intelligence score causes you to take penalties on Intelligence-based skill checks. This penalty also applies to any spell DCs based on Intelligence.

WISDOM

Damage to your Wisdom score causes you to take penalties on Wisdom-based skill checks and Will saving throws. This penalty also applies to any spell DCs based on Wisdom.

CHARISMA

Damage to your Charisma score causes you to take penalties on Charisma-based skill checks. This penalty also applies to any spell DCs based off Charisma and the DC to resist your channeled energy.

ABILITY DRAIN

Ability drain actually reduces the relevant ability score. Modify all skills and statistics related to that ability. This might cause you to lose skill points, hit points, and other bonuses. Ability drain can be healed through the use of spells such as *restoration*.

AFFLICTIONS

From curses to poisons to diseases, there are a number of afflictions that can affect a creature. While each of these afflictions has a different effect, they all function using the same basic system. All afflictions grant a saving throw when they are contracted. If successful, the creature does not suffer from the affliction and does not need to make any further rolls. If the saving throw is a failure, the creature falls victim to the affliction and must deal with its effects.

Afflictions require a creature to make a saving throw after a period of time to avoid taking certain penalties. With most afflictions, if a number of saving throws are made consecutively, the affliction is removed and no further saves are necessary. Some afflictions, usually supernatural ones, cannot be cured through saving throws alone and require the aid of powerful magic to remove. Each affliction is presented as a short block of information to help you better adjudicate its results.

NAME

This is the name of the affliction.

TYPE

This is the type of the affliction, such as curse, disease, or poison. It might also include the means by which it is contracted, such as contact, ingestion, inhalation, injury, spell, or trap.

SAVE

This gives the type of save necessary to avoid contracting the affliction, as well as the DC of that save. Unless otherwise noted, this is also the save to avoid the affliction's effects once it is contracted, as well as the DC of any caster level checks needed to end the affliction through magic, such as *remove curse* or *neutralize poison*.

ONSET

Some afflictions have a variable amount of time before they set in. Creatures that come in contact with an affliction with an onset time must make a saving throw immediately. Success means that the affliction is avoided and no further saving throws must be made. Failure means that the creature has contracted the affliction and must begin making additional saves after the onset period has elapsed. The affliction's effect does not occur until after the onset period has elapsed and then only if further saving throws are failed.

FREQUENCY

This is how often the periodic saving throw must be attempted after the affliction has been contracted (after the onset time, if the affliction has any). While some afflictions last until they are cured, others end prematurely, even if the character is not cured through other means. If an affliction ends after a set amount of time, it will be noted in the frequency. For example, a disease with a frequency of "1/day" lasts until cured, but a poison with a frequency of "1/round for 6 rounds" ends after 6 rounds have passed.

Afflictions without a frequency occur only once, immediately upon contraction (or after the onset time if one is listed).

EFFECT

This is the effect that the character suffers each time if he fails his saving throw against the affliction. Most afflictions cause ability damage or hit point damage. These effects are cumulative, but they can be cured normally. Other afflictions cause the creature to take penalties or other effects. These effects are sometimes cumulative, with the rest only affecting the creature if it failed its most recent save. Some afflictions have different effects after the first save is failed. These afflictions have an initial effect, which occurs when the first save is failed, and a secondary effect, when additional saves are failed, as noted in the text. Hit point and ability score damage caused by an affliction cannot be healed naturally while the affliction persists.

CURE

This tells you how the affliction is cured. Commonly, this is a number of saving throws that must be made consecutively. Even if the affliction has a limited frequency, it might be cured prematurely if enough saving throws are made. Hit point damage and ability score damage is not removed when an affliction is cured. Such damage must be healed normally. Afflictions without a cure entry can only be cured through powerful spells, such as *neutralize poison* and *remove curse*. No matter how many saving throws are made, these afflictions continue to affect the target.

He failed a DC 15 Fortitude save to avoid contracting it, so after the onset period of 1d3 days has passed, he must make another DC 15 Fortitude save to avoid taking 1d6 points of Strength damage. From this point onward, he must make a DC 15 Fortitude save each day (according to the disease's frequency) to avoid further Strength damage. If, on two consecutive days, he makes his Fortitude saves, he is cured of the disease and any damage it caused begins to heal as normal.

CURSES

Careless rogues plundering a tomb, drunken heroes insulting a powerful wizard, and foolhardy adventurers who pick up ancient swords all might suffer from curses. These magic afflictions can have a wide variety of effects, from a simple penalty to certain checks to transforming the victim into a toad. Some even cause the afflicted to slowly rot away, leaving nothing behind but dust. Unlike other afflictions, most curses cannot be cured through a number of successful saving throws. Curses can be cured through magic, however, usually via spells such as *remove curse* and *break enchantment*. While some curses cause a progressive deterioration, others inflict a static penalty from the moment they are contracted, neither fading over time nor growing worse. In addition, there are a number of magic items that act like curses. See Magic Items for a description of these cursed items.

The following samples present just some of the possibilities when creating curses. (The 6 named sample curses in the core rulebook, such as Baleful Polymorph, Bestow Curse Trap, Curse of the Ages, Mummy Rot, Unluck, and Werewolf Lycanthropy, are presented as structured stat blocks rather than prose descriptions, so their full writeups are deferred to a future data batch.)

DISEASES

From a widespread plague to the bite of a dire rat, disease is a serious threat to common folk and adventurers alike. Diseases rarely have a limited frequency, but most have a lengthy onset time. This onset time can also be variable. Most diseases can be cured by a number of consecutive saving throws or by spells such as *remove disease*.

The following samples represent just some of the possibilities when creating diseases. (The 11 named sample diseases in the core rulebook, such as Blinding Sickness, Bubonic Plague, Cackle Fever, Demon Fever, Devil Chills, Filth Fever, Leprosy, Mindfire, Red Ache, Shakes, and Slimy Doom, are presented as structured stat blocks rather than prose descriptions, so their full writeups are deferred to a future data batch.)

POISON

No other affliction is so prevalent as poison. From the fangs of a viper to the ichor-stained assassin's blade, poison is a constant threat. Poisons can be cured by successful saving throws and spells such as *neutralize poison*.

Contact poisons are contracted the moment someone touches the poison with his bare skin. Such poisons can be used as injury poisons. Contact poisons usually have an onset time of 1 minute and a frequency of 1 minute. Ingested poisons are contracted when a creature eats or drinks the poison. Ingested poisons usually have an onset time of 10 minutes and a frequency of 1 minute. Injury poisons are primarily contracted through the attacks of certain creatures and through weapons coated in the toxin. Injury poisons do not usually have an onset time and have a frequency of 1 round. Inhaled poisons are contracted the moment a creature enters an area containing such poisons. Most inhaled poisons fill a volume equal to a 10-foot cube per dose. Creatures can attempt to hold their breaths while inside to avoid inhaling the toxin. Creatures holding their breaths receive a 50% chance of not having to make a Fortitude save each round. See the rules for holding your breath and suffocation in Environment. Note that a character that would normally suffocate while attempting to hold its breath instead begins to breathe normally again.

Unlike other afflictions, multiple doses of the same poison stack. Poisons delivered by injury and contact cannot inflict more than one dose of poison at a time, but inhaled and ingested poisons can inflict multiple doses at once. Each additional dose extends the total duration of the poison (as noted under frequency) by half its total duration. In addition, each dose of poison increases the DC to resist the poison by +2. This increase is cumulative. Multiple doses do not alter the cure conditions of the poison, and meeting these conditions ends the affliction for all the doses. For example, a character is bit three times in the same round by a trio of Medium monstrous spiders, injecting him with three doses of Medium spider venom. The unfortunate character must make a DC 18 Fortitude save for the next 8 rounds. Fortunately, just one successful save cures the character of all three doses of the poison.

Applying poison to a weapon or single piece of ammunition is a standard action. Whenever a character applies or readies a poison for use there is a 5% chance that he exposes himself to the poison and must save against the poison as normal. This does not consume the dose of poison. Whenever a character attacks with a poisoned weapon, if the attack roll results in a natural 1, he exposes himself to the poison. This poison is consumed when the weapon strikes a creature or is touched by the wielder. Characters with the poison use class feature do not risk accidentally poisoning themselves.

Poisons can be made using Craft (alchemy). The DC to make a poison is equal to its Fortitude save DC. Rolling a natural 1 on a Craft skill check while making a poison exposes the crafter to the poison. Crafters with the poison use class feature do not risk poisoning themselves when using Craft to make poison.

The following samples represent just some of the possibilities when creating poisons.

TABLE: SAMPLE POISONS

NAME	TYPE	FORT DC	ONSET	FREQUENCY	EFFECT	CURE	COST
Arsenic	ingested	13	10 min.	1/min. for 4 min.	1d2 Con	1 save	120 gp
Belladonna	ingested	14	10 min.	1/min. for 6 min.	1d2 Str, see text	1 save	100 gp
Black adder venom	injury	11	–	1/rd. for 6 rds.	1d2 Con	1 save	120 gp
Black lotus extract	contact	20	1 min.	1/rd. for 6 rds.	1d6 Con	2 saves	4,500 gp
Bloodroot	injury	12	1 rd.	1/rd. for 4 rds.	1 Con and 1 Wis	1 save	100 gp
Blue whinnis	injury	14	–	1/rd. for 2 rds	1 Con/unconscious 1d3 hours	1 save	120 gp
Burnt othur fumes	inhaled	18	–	1/rd. for 6 rds.	1 Con drain/1d3 Con	2 saves	2,100 gp
Dark reaver powder	ingested	18	10 min.	1/min. for 6 min.	1d3 Con and 1 Str	2 saves	800 gp
Deathblade	injury	20	–	1/rd. for 6 rds.	1d3 Con	2 saves	1,800 gp
Dragon bile	contact	26	–	1/rd. for 6 rds.	1d3 Str	–	1,500 gp
Drow poison	injury	13	–	1/min. for 2 min.	unconscious 1 min./2d4 hours	1 save	75 gp
Giant wasp poison	injury	18	–	1/rd. for 6 rds.	1d2 Dex	1 save	210 gp
Greenblood oil	injury	13	–	1/rd. for 4 rds.	1 Con	1 save	100 gp
Green prismatic poison	spell	varies	–	1/rd.	for 6 rds. Death/1 Con	2 saves	–
Hemlock	ingested	18	10 min.	1/min. for 6 min.	1d6 Dex, see text	2 saves	2,500 gp
Id moss	ingested	14	10 min.	1/min. for 6 min.	1d3 Int	1 save	125 gp
Insanity mist	inhaled	15	–	1/rd. for 6 rds.	1d3 Wis	1 save	1,500 gp
King's sleep	ingested	19	1 day	1/day	1 Con drain	2 saves	5,000 gp
Large scorpion venom	injury	17	–	1/rd. for 6 rds.	1d2 Str	1 save	200 gp
Lich dust	ingested	17	10 min.	1/min. for 6 min.	1d3 Str	2 saves	400 gp
Malyass root paste	contact	16	1 min.	1/min. for 6 min.	1d2 Dex	1 save	250 gp
Medium spider venom	injury	14	–	1/rd. for 4 rds.	1d2 Str	1 save	150 gp
Nightmare vapor	inhaled	20	–	1/rd. for 6 rds.	1 Wis and confused 1 round	2 saves	1,800 gp
Nitharit	contact	13	1 min.	1/min. for 6 min.	1d3 Con	1 save	650 gp
Oil of taggit	ingested	15	min.	–	unconscious 1d3 hours	1 save	90 gp
Purple worm poison	injury	24	–	1/rd. for 6 rds.	1d3 Str	2 saves	700 gp
Sassone leaf residue	contact	16	1 min.	1/min. for 6 min.	2d12 hp/1 Con	1 save	300 gp
Shadow essence	injury	17	–	1/rd. for 6 rds.	1 Str drain/1d2 Str	1 save	250 gp
Small centipede poison	injury	11	–	1/rd. for 4 rds.	1 Dex	save	90 gp
Striped toadstool	ingested	11	10 min.	1/min. for 4 min.	1d3 Wis and 1 Int	1 save	180 gp
Tears of death	contact	22	1 min.	1/min. for 6 min.	1d6 Con and paralyzed 1 min.	–	6,500 gp
Terinav root	contact	16	1 min.	1/min. for 6 min.	1d3 Dex	1 save	400 gp
Ungol dust	inhaled	15	–	1/rd. for 4 rds.	1 Cha drain/1d2 Cha	1 save	1,000 gp
Wolfsbane	ingested	16	10 min.	1/min. for 6 min.	1d3 Con	1 save	500 gp
Wyvern poison	injury	17	–	1/rd. for 6 rds.	1d4 Con	2 saves	3,000 gp

BLINDSIGHT AND BLINDSENSE

Some creatures possess blindsight, the extraordinary ability to use a nonvisual sense (or a combination senses) to operate effectively without vision. Such senses may include sensitivity to vibrations, acute scent, keen hearing, or echolocation. This makes invisibility and concealment (even magical darkness) irrelevant to the creature (though it still can't see ethereal creatures). This ability operates out to a range specified in the creature description.

- ♦ Blindsight never allows a creature to distinguish color or visual contrast. A creature cannot read with blindsight.
- ♦ Blindsight does not subject a creature to gaze attacks (even though darkvision does).
- ♦ Blinding attacks do not penalize creatures that use blindsight.
- ♦ Deafening attacks thwart blindsight if it relies on hearing.
- ♦ Blindsight works underwater but not in a vacuum.
- ♦ Blindsight negates displacement and blur effects.

BLINDSENSE

Other creatures have blindsense, a lesser ability that lets the creature notice things it cannot see, but without the precision of blindsight. The creature with blindsense usually does not need to make Perception checks to notice and locate creatures within range of its blindsense ability, provided that it has line of effect to that creature. Any opponent that cannot be seen has total concealment (50% miss chance) against a creature with blindsense, and the blindsensing creature still has the normal miss chance when attacking foes that have concealment. Visibility still affects the movement of a creature with blindsense. A creature with blindsense is still denied its Dexterity bonus to Armor Class against attacks from creatures it cannot see.

CHANNEL RESISTANCE

Creatures with channel resistance gain a bonus on Will saves made against channeled energy. They add their bonus to any Will saves made to halve the damage and resist the effect.

CHARM AND COMPULSION

Many abilities and spells can cloud the minds of characters and monsters, leaving them unable to tell friend from foe—or worse yet, deceiving them into thinking that their former friends are now their worst enemies. Two general types of enchantments affect characters and creatures: charms and compulsions.

Charming another creature gives the charming character the ability to befriend and suggest courses of action to his minion, but the servitude is not absolute or mindless. Charms of this type include the various *charm* spells and some monster abilities. Essentially, a *charmed* character retains free will but makes choices according to a skewed view of the world.

- ♦ A charmed creature doesn't gain any magical ability to understand his new friend's language.

- ♦ A charmed character retains his original alignment and allegiances, generally with the exception that he now regards the charming creature as a dear friend and will give great weight to his suggestions and directions.

A charmed character fights his former allies only if they threaten his new friend, and even then he uses the least

- ♦ lethal means at his disposal as long as these tactics show any possibility of success (just as he would in a fight with an actual friend).

A charmed character is entitled to an opposed Charisma check against his master in order to resist instructions or

- ♦ commands that would make him do something he wouldn't normally do even for a close friend. If he succeeds, he decides not to go along with that order but remains charmed.

- ♦ A charmed character never obeys a command that is obviously suicidal or grievously harmful to him.

- ♦ If the charming creature commands his minion to do something that the influenced character would be violently opposed to, the subject may attempt a new saving throw to break free of the influence altogether.

- ♦ A charmed character who is openly attacked by the creature who charmed him or by that creature's apparent allies is automatically freed of the spell or effect.

Compulsion is a different matter altogether. A compulsion overrides the subject's free will in some way or simply changes the way the subject's mind works. A charm makes the subject a friend of the caster; a compulsion makes the subject obey the caster.

Regardless of whether a character is charmed or compelled, he does not volunteer information or tactics that his master doesn't ask for.

DAMAGE REDUCTION

Some magic creatures have the supernatural ability to instantly heal damage from weapons or ignore blows altogether as though they were invulnerable.

The numerical part of a creature's damage reduction (or DR) is the amount of damage the creature ignores from normal attacks. Usually, a certain type of weapon can overcome this reduction (see Overcoming DR). This information is separated from the damage reduction number by a slash. For example, DR 5/magic means that a creature takes 5 less points of damage from all weapons that are not magic. If a dash follows the slash, then the damage reduction is effective against any attack that does not ignore damage reduction.

Whenever damage reduction completely negates the damage from an attack, it also negates most special effects that accompany the attack, such as injury poison, a monk's stunning, and injury-based disease. Damage reduction does not negate touch attacks, energy damage dealt along with an attack, or energy drains. Nor does it affect poisons or diseases delivered by inhalation, ingestion, or contact.

Attacks that deal no damage because of the target's damage reduction do not disrupt spells.

Spells, spell-like abilities, and energy attacks (even nonmagical fire) ignore damage reduction.

Sometimes damage reduction represents instant healing. Sometimes it represents the creature's tough hide or body. In either case, other characters can see that conventional attacks won't work.

If a creature has damage reduction from more than one source, the two forms of damage reduction do not stack. Instead, the creature gets the benefit of the best damage reduction in a given situation.

OVERCOMING DR

Damage reduction may be overcome by special materials, magic weapons (any weapon with a +1 or higher enhancement bonus, not counting the enhancement from masterwork quality), certain types of weapons (such as slashing or bludgeoning), and weapons imbued with an alignment.

Ammunition fired from a projectile weapon with an enhancement bonus of +1 or higher is treated as a magic weapon for the purpose of overcoming damage reduction. Similarly, ammunition fired from a projectile weapon with an alignment gains the alignment of that projectile weapon (in addition to any alignment it may already have).

Weapons with an enhancement bonus of +3 or greater can ignore some types of damage reduction, regardless of their actual material or alignment. The following table shows what type of enhancement bonus is needed to overcome some common types of damage reduction.

DR Type

DR TYPE	WEAPON ENHANCEMENT BONUS EQUIVALENT
cold iron/silver	+3
adamantine*	+4
alignment-based	+5

- ♦ Note that this does not give the ability to ignore hardness, like an actual adamantine weapon does

DARKVISION

Darkvision is the extraordinary ability to see with no light source at all, out to a range specified for the creature. Darkvision is black-and-white only (colors cannot be discerned). It does not allow characters to see anything that they could not see otherwise—invisible objects are still invisible, and illusions are still visible as what they seem to be. Likewise, darkvision subjects a creature to gaze attacks normally. The presence of light does not spoil darkvision.

DEATH ATTACKS

In most cases, a death attack allows the victim a Fortitude save to avoid the effect, but if the save fails, the creature takes a large amount of damage, which might cause it to die instantly.

- ♦ *Raise dead* doesn't work on someone killed by a death attack or effect.
- ♦ Death attacks slay instantly. A victim cannot be made stable and thereby kept alive.
- ♦ In case it matters, a dead character, no matter how he died, has hit points equal to or less than his negative Constitution score.
- ♦ The spell *death ward* protects against these attacks.

ENERGY DRAIN AND NEGATIVE LEVELS

Some spells and a number of undead creatures have the ability to drain away life and energy; this dreadful attack results in “negative levels.” These cause a character to take a number of penalties.

For each negative level a creature has, it takes a cumulative -1 penalty on all ability checks, attack rolls, combat maneuver checks, Combat Maneuver Defense, saving throws, and skill checks. In addition, the creature reduces its current and total hit points by 5 for each negative level it possesses. The creature is also treated as one level lower for the purpose of level-dependent variables (such as spellcasting) for each negative level possessed. Spellcasters do not lose any prepared spells or slots as a result of negative levels. If a creature’s negative levels equal or exceed its total Hit Dice, it dies.

A creature with temporary negative levels receives a new saving throw to remove the negative level each day. The DC of this save is the same as the effect that caused the negative levels.

Some abilities and spells (such as *raise dead*) bestow permanent level drain on a creature. These are treated just like temporary negative levels, but they do not allow a new save each day to remove them. Level drain can be removed through spells like *restoration*. Permanent negative levels remain after a dead creature is restored to life. A creature whose permanent negative levels equal its Hit Dice cannot be brought back to life through spells like *raise dead* and *resurrection* without also receiving a *restoration* spell, cast the round after it is restored to life.

ENERGY IMMUNITY AND VULNERABILITY

A creature with energy immunity never takes damage from that energy type. Vulnerability means the creature takes half again as much (+50%) damage as normal from that energy type, regardless of whether a saving throw is allowed or if the save is a success or failure.

ENERGY RESISTANCE

A creature with resistance to energy has the ability (usually extraordinary) to ignore some damage of a certain type per attack, but it does not have total immunity.

Each resistance ability is defined by what energy type it resists and how many points of damage are resisted. It doesn’t matter whether the damage has a mundane or magical source.

When resistance completely negates the damage from an energy attack, the attack does not disrupt a spell. This resistance does not stack with the resistance that a spell might provide.

FEAR

Spells, magic items, and certain monsters can affect characters with fear. In most cases, the character makes a Will saving throw to resist this effect, and a failed roll means that the character is shaken, frightened, or panicked.

SHAKEN

Characters who are shaken take a -2 penalty on attack rolls, saving throws, skill checks, and ability checks.

FRIGHTENED

Characters who are frightened are shaken, and in addition they flee from the source of their fear as quickly as they can. They can choose the paths of their flight. Other than that stipulation, once they are out of sight (or hearing) of the source of their fear, they can act as they want. If the duration of their fear continues, however, characters can be forced to flee if the source of their fear presents itself again. Characters unable to flee can fight (though they are still shaken).

PANICKED

Characters who are panicked are shaken, and they run away from the source of their fear as quickly as they can, dropping whatever they are holding. Other than running away from the source, their paths are random. They flee from all other dangers that confront them rather than facing those dangers. Once they are out of sight (or hearing) of any source of danger, they can act as they want. Panicked characters cover if they are prevented from fleeing.

BECOMING EVEN MORE FEARFUL

Fear effects are cumulative. A shaken character who is made shaken again becomes frightened, and a shaken character who is made frightened becomes panicked instead. A frightened character who is made shaken or frightened becomes panicked instead.

INVISIBILITY

The ability to move about unseen is not foolproof. While they can't be seen, invisible creatures can be heard, smelled, or felt.

Invisibility makes a creature undetectable by vision, including darkvision.

Invisibility does not, by itself, make a creature immune to critical hits, but it does make the creature immune to extra damage from being a ranger's favored enemy and from sneak attacks.

A creature can generally notice the presence of an active invisible creature within 30 feet with a DC 20 Perception check. The observer gains a hunch that "something's there" but can't see it or target it accurately with an attack. It's practically impossible (+20 DC) to pinpoint an invisible creature's location with a Perception check. Even once a character has pinpointed the square that contains an invisible creature, the creature still benefits from total concealment (50% miss chance). There are a number of modifiers that can be applied to this DC if the invisible creature is moving or engaged in a noisy activity.

INVISIBLE CREATURE IS...

INVISIBLE CREATURE IS...	PERCEPTION
In combat or speaking	-20
Moving at half speed	-5
Moving at full speed	-10
Running or charging	-20
Not moving	+20
Using Stealth	Stealth check +20
Some distance away	+1 per 10 feet
Behind an obstacle (door)	+5
Behind an obstacle (stone wall)	+15
A creature can grope about to find an invisible creature. A character can make a touch attack with his hands or a weapon into two adjacent 5-foot squares using a standard action. If an invisible target is in the designated area, there is a 50% miss chance on the touch attack. If successful, the groping character deals no damage but has successfully pinpointed the invisible creature's current location. If the invisible creature moves, its location, obviously, is once again unknown.	

If an invisible creature strikes a character, the character struck knows the location of the creature that struck him (until, of course, the invisible creature moves). The only exception is if the invisible creature has a reach greater than 5 feet. In this case, the struck character knows the general location of the creature but has not pinpointed the exact location.

If a character tries to attack an invisible creature whose location he has pinpointed, he attacks normally, but the invisible creature still benefits from full concealment (and thus a 50% miss chance). A particularly large and slow invisible creature might get a smaller miss chance.

If a character tries to attack an invisible creature whose location he has not pinpointed, have the player choose the space where the character will direct the attack. If the invisible creature is there, conduct the attack normally. If the enemy's not there, roll the miss chance as if it were there and tell him that the character has missed, regardless of the result. That way the player doesn't know whether the attack missed because the enemy's not there or because you successfully rolled the miss chance.

If an invisible character picks up a visible object, the object remains visible. An invisible creature can pick up a small visible item and hide it on his person (tucked in a pocket or behind a cloak) and render it effectively invisible. One could coat an invisible object with flour to at least keep track of its position (until the flour falls off or blows away).

Invisible creatures leave tracks. They can be tracked normally. Footprints in sand, mud, or other soft surfaces can give enemies clues to an invisible creature's location.

An invisible creature in the water displaces water, revealing its location. The invisible creature, however, is still hard to see and benefits from concealment.

A creature with the scent ability can detect an invisible creature as it would a visible one.

A creature with the Blind-Fight feat has a better chance to hit an invisible creature. Roll the miss chance twice, and he misses only if both rolls indicate a miss. (Alternatively, make one 25% miss chance roll rather than two 50% miss chance rolls.)

A creature with blindsight can attack (and otherwise interact with) creatures regardless of invisibility.

An invisible burning torch still gives off light, as does an invisible object with a *light* or similar spell cast upon it.

Ethereal creatures are invisible. Since ethereal creatures are not materially present, Perception checks, scent, Blind-Fight, and blindsight don't help locate them. Incorporeal creatures are often invisible. Scent, Blind-Fight, and blindsight don't help creatures find or attack invisible, incorporeal creatures, but Perception checks can help.

Invisible creatures cannot use gaze attacks.

Invisibility does not thwart divination spells.

Since some creatures can detect or even see invisible creatures, it is helpful to be able to hide even when invisible.

LOW-LIGHT VISION

Characters with low-light vision have eyes that are so sensitive to light that they can see twice as far as normal in dim light. Low-light vision is color vision. A spellcaster with low-light vision can read a scroll as long as even the tiniest candle flame is next to him as a source of light.

Characters with low-light vision can see outdoors on a moonlit night as well as they can during the day.

PARALYSIS

Some monsters and spells have the supernatural or spell-like ability to paralyze their victims, immobilizing them through magical means. Paralysis from poison is discussed in the Afflictions section.

A paralyzed character cannot move, speak, or take any physical action. He is rooted to the spot, frozen and helpless. Not even friends can move his limbs. He may take purely mental actions, such as casting a spell with no components.

A winged creature flying in the air at the time that it becomes paralyzed cannot flap its wings and falls. A swimmer can't swim and may drown.

SCENT

This extraordinary ability lets a creature detect approaching enemies, sniff out hidden foes, and track by sense of smell.

A creature with the scent ability can detect opponents by sense of smell, generally within 30 feet. If the opponent is upwind, the range is 60 feet. If it is downwind, the range is 15 feet. Strong scents, such as smoke or rotting garbage, can be detected at twice the ranges noted above. Overpowering scents, such as skunk musk or troglodyte stench, can be detected at three times these ranges.

The creature detects another creature's presence but not its specific location. Noting the direction of the scent is a move action. If the creature moves within 5 feet (1 square) of the scent's source, the creature can pinpoint the area that the source occupies, even if it cannot be seen.

A creature with the Survival skill and the scent ability can follow tracks by smell, making a Survival check to find or follow a track. A creature with the scent ability can attempt to follow tracks using Survival untrained. The typical DC for a fresh trail is 10. The DC increases or decreases depending on how strong the quarry's odor is, the number of creatures, and the age of the trail. For each hour that the trail is cold, the DC increases by 2. The ability otherwise follows the rules for the Survival skill in regards to tracking. Creatures tracking by scent ignore the effects of surface conditions and poor visibility.

Creatures with the scent ability can identify familiar odors just as humans do familiar sights.

Water, particularly running water, ruins a trail for air-breathing creatures. Water-breathing creatures that have the scent ability, however, can use it in the water easily.

False, powerful odors can easily mask other scents. The presence of such an odor completely spoils the ability to properly detect or identify creatures, and the base Survival DC to track becomes 20 rather than 10.

SPELL RESISTANCE

Spell resistance is the extraordinary ability to avoid being affected by spells. Some spells also grant spell resistance.

To affect a creature that has spell resistance, a spellcaster must make a caster level check (1d20 + caster level) at least equal to the creature's spell resistance. The defender's spell resistance is like an Armor Class against magical attacks. If the caster fails the check, the spell doesn't affect the creature. The possessor does not have to do anything special to use spell resistance. The creature need not even be aware of the threat for its spell resistance to operate.

Only spells and spell-like abilities are subject to spell resistance. Extraordinary and supernatural abilities (including enhancement bonuses on magic weapons) are not. A creature can have some abilities that are subject to spell resistance and some that are not. Even some spells ignore spell resistance; see *When Spell Resistance Applies*, below.

A creature can voluntarily lower its spell resistance. Doing so is a standard action that does not provoke an attack of opportunity. Once a creature lowers its resistance, it remains down until the creature's next turn. At the beginning of the creature's next turn, the creature's spell resistance automatically returns unless the creature intentionally keeps it down (also a standard action that does not provoke an attack of opportunity).

A creature's spell resistance never interferes with its own spells, items, or abilities.

A creature with spell resistance cannot impart this power to others by touching them or standing in their midst. Only the rarest of creatures and a few magic items have the ability to bestow spell resistance upon another.

Spell resistance does not stack, but rather overlaps.

WHEN SPELL RESISTANCE APPLIES

Each spell includes an entry that indicates whether spell resistance applies to the spell. In general, whether spell resistance applies depends on what the spell does.

TARGETED SPELLS

Spell resistance applies if the spell is targeted at the creature. Some individually targeted spells can be directed at several creatures simultaneously. In such cases, a creature's spell resistance applies only to the portion of the spell actually targeted at that creature. If several different resistant creatures are subjected to such a spell, each checks its spell resistance separately.

AREA SPELLS

Spell resistance applies if the resistant creature is within the spell's area. It protects the resistant creature without affecting the spell itself.

EFFECT SPELLS

Most effect spells summon or create something and are not subject to spell resistance. Sometimes, however, spell resistance applies to effect spells, usually to those that act upon a creature more or less directly, such as *web*.

Spell resistance can protect a creature from a spell that's already been cast. Check spell resistance when the creature is first affected by the spell.

Check spell resistance only once for any particular casting of a spell or use of a spell-like ability. If spell resistance fails the first time, it fails each time the creature encounters that same casting of the spell. Likewise, if the spell resistance succeeds the first time, it always succeeds. If the creature has voluntarily lowered its spell resistance and is then subjected to a spell, the creature still has a single chance to resist that spell later, when its spell resistance is back up.

Spell resistance has no effect unless the energy created or released by the spell actually goes to work on the resistant creature's mind or body. If the spell acts on anything else and the creature is affected as a consequence, no roll is required. Spell-resistant creatures can be harmed by a spell when they are not being directly affected.

Spell resistance does not apply if an effect fools the creature's senses or reveals something about the creature.

Magic actually has to be working for spell resistance to apply. Spells that have instantaneous durations but lasting results aren't subject to spell resistance unless the resistant creature is exposed to the spell the instant it is cast.

SUCCESSFUL SPELL RESISTANCE

Spell resistance prevents a spell or a spell-like ability from affecting or harming the resistant creature, but it never removes a magical effect from another creature or negates a spell's effect on another creature. Spell resistance prevents a spell from disrupting another spell.

Against an ongoing spell that has already been cast, a failed check against spell resistance allows the resistant creature to ignore any effect the spell might have. The magic continues to affect others normally.
