

SKILLS

Skills represent some of the most basic and yet most fundamental abilities your character possesses. As your character advances in level, he can gain new skills and improve his existing skills dramatically.

ACQUIRING SKILLS

Each level, your character gains a number of skill ranks dependent upon your class plus your Intelligence modifier. Investing a rank in a skill represents a measure of training in that skill. You can never have more ranks in a skill than your total number of Hit Dice. In addition, each class has a number of favored skills, called class skills. It is easier for your character to become more proficient in these skills, as they represent part of his professional training and constant practice. You gain a +3 bonus on all class skills that you put ranks into. If you have more than one class and both grant you a class skill bonus, these bonuses do not stack.

TABLE: SKILL RANKS PER LEVEL

CLASS	SKILL RANKS PER LEVEL
Barbarian	4 + Int modifier
Bard	6 + Int modifier
Cleric	2 + Int modifier
Druid	4 + Int modifier
Fighter	2 + Int modifier
Monk	4 + Int modifier
Paladin	2 + Int modifier
Ranger	6 + Int modifier
Rogue	8 + Int modifier
Sorcerer	2 + Int modifier
Wizard	2 + Int modifier

The number of skill ranks you gain when taking a level in one of the base classes is shown above. Humans gain 1 additional skill rank per class level. Characters who take a level in a favored class have the option of gaining 1 additional skill rank or an additional hit point. If you select a level in a new class, all of its class skills are automatically added to your list of class skills, and you gain a +3 bonus on these skills if you have ranks in them.

SKILL CHECKS

When your character uses a skill, he isn't guaranteed success. In order to determine success, whenever you attempt to use a skill, you must make a skill check.

Each skill rank grants a +1 bonus on checks made using that skill. When you make a skill check, you roll 1d20 and then add your ranks and the appropriate ability score modifier to the result of this check. If the skill you're using is a class skill (and you have invested ranks into that skill), you gain a +3 bonus on the check. If you are not trained in the skill (and if the skill may be used untrained), you may still attempt the skill, but you use only the bonus (or penalty) provided by the associated ability score modifier to modify the check. Skills can be further modified by a wide variety of sources – by your race, by a class ability, by equipment, by spell effects or magic items, and so on.

SKILL	SKILL CHECK IS EQUAL TO*
Untrained	1d20 + ability modifier + racial modifier
Trained	1d20 + skill ranks + ability modifier + racial modifier
Trained Class Skill	1d20 + skill ranks + ability modifier + racial modifier + 3

If the result of your skill check is equal to or greater than the difficulty class (or DC) of the task you are attempting to accomplish, you succeed. If it is less than the DC, you fail. Some tasks have varying levels of success and failure depending on how much your check is above or below the required DC. Some skill checks are opposed by the target's skill check. When making an opposed skill check, the attempt is successful if your check result exceeds the result of the target.

TAKING 10 AND TAKING 20

A skill check represents an attempt to accomplish some goal, usually while under some sort of time pressure or distraction. Sometimes, though, a character can use a skill under more favorable conditions, increasing the odds of success.

Taking 10. When your character is not in immediate danger or distracted, you may choose to take 10. Instead of rolling 1d20 for the skill check, calculate your result as if you had rolled a 10. For many routine tasks, taking 10 makes them automatically successful. Distractions or threats (such as combat) make it impossible for a character to take 10.

Taking 20. When you have plenty of time, you are faced with no threats or distractions, and the skill being attempted carries no penalties for failure, you can take 20. Instead of rolling 1d20 for the skill check, just calculate your result as if you had rolled a 20. Taking 20 takes 20 times as long as making a single check would take. Since taking 20 assumes that your character will fail many times before succeeding, your character would automatically incur any penalties for failure before completing the task (hence why it is generally not allowed with skills that carry such penalties). Common "take 20" skills include Disable Device (when used to open locks), Escape Artist, and Perception (when attempting to find traps).

The normal take 10 and take 20 rules apply for ability checks. Neither rule applies to concentration checks or caster level checks.

AID ANOTHER

You can help someone achieve success on a skill check by making the same kind of skill check in a cooperative effort. If you roll a 10 or higher on your check, the character you're helping gets a +2 bonus on his or her check. (You can't take 10 on a skill check to aid another.) In many cases, a character's help won't be beneficial, or only a limited number of characters can help at once.

In cases where the skill restricts who can achieve certain results, such as trying to open a lock using Disable Device, you can't aid another to grant a bonus to a task that your character couldn't achieve alone. The GM might impose further restrictions to aiding another on a case-by-case basis as well.

SKILL DESCRIPTIONS

This section describes each skill, including common uses and typical modifiers. Characters can sometimes use skills for purposes other than those noted here, at the GM's discretion.

ACROBATICS (DEX)

Trained only. Armor check penalty applies.

You can keep your balance while traversing narrow or treacherous surfaces. You can also dive, flip, jump, and roll to avoid attacks and overcome obstacles.

Check

You can use Acrobatics to move on narrow surfaces and uneven ground without falling. A successful check allows you to move at half speed across such surfaces – only one check is needed per round. Use the following table to determine the base DC, which is then modified by the Acrobatics skill modifiers noted below. While you are using Acrobatics in this way, you are considered flat-footed and lose your Dexterity bonus to your AC (if any). If you take damage while using Acrobatics, you must immediately make another Acrobatics check at the same DC to avoid falling or being knocked prone.

SURFACE WIDTH	BASE ACROBATICS DC
Greater than 3 feet wide	0*
1-3 feet wide	5*
7-11 inches wide	10
2-6 inches wide	15
Less than 2 inches wide	20

In addition, you can move through a threatened square without provoking an attack of opportunity from an enemy by using Acrobatics. When moving in this way, you move at half speed. You can move at full speed by increasing the DC of the check by 10. You cannot use Acrobatics to move past foes if your speed is reduced due to carrying a medium or heavy load or wearing medium or heavy armor. If an ability allows you to move at full speed under such conditions, you can use Acrobatics to move past foes. You can use Acrobatics in this way while prone, but doing so requires a full-round action to move 5 feet, and the DC is increased by 5. If you attempt to move through an enemy's space and fail the check, you lose the move action and provoke an attack of opportunity.

SITUATION	BASE AEROBATICS DC*
Move through a threatened area	Opponent's Combat Maneuver Defense
Move through an enemy's space	5 + opponent's Combat Maneuver Defense
Long Jump	Acrobatics DC
—	—
5 feet	5
10 feet	10
15 feet	15
20 feet	20
Greater than 20 feet	+5 per 5 feet
High Jump	Acrobatics DC
—	—
1 foot	4
2 feet	8
3 feet	12
4 feet	16
Greater than 4 feet	+4 per foot

Finally, you can use the Acrobatics skill to make jumps or to soften a fall. The base DC to make a jump is equal to the distance to be crossed (if horizontal) or four times the height to be reached (if vertical). These DCs double if you do not have at least 10 feet of space to get a running start. The only Acrobatics modifiers that apply are those concerning the surface you are jumping from. If you fail this check by 4 or less, you can attempt a DC 20 Reflex save to grab hold of the other side after having missed the jump. If you fail by 5 or more, you fail to make the jump and fall (or land prone, in the case of a vertical jump). Creatures with a base land speed above 30 feet receive a +4 racial bonus on Acrobatics checks made to jump for every 10 feet of their speed above 30 feet. Creatures with a base land speed below 30 feet receive a -4 racial bonus on Acrobatics checks made to jump for every 10 feet of their speed below 30 feet. No jump can allow you to exceed your maximum movement for the round. For a running jump, the result of your Acrobatics check indicates the distance traveled in the jump (and if the check fails, the distance at which you actually land and fall prone). Halve this result for a standing long jump to determine where you land.

When you deliberately fall any distance, even as a result of a missed jump, a DC 15 Acrobatics skill check allows you to ignore the first 10 feet fallen, although you still end up prone if you take damage from a fall. See the falling rules for further details.

Many conditions can affect your chances of success with Acrobatics checks. The following modifiers to target DCs apply to all Acrobatics skill checks. The modifiers stack with one another, but only the most severe modifier for any one condition applies.

ACROBATICS MODIFIERS	DC MODIFIER
Slightly obstructed (gravel, sand)	+2
Severely obstructed (cavern, rubble)	+5
Slightly slippery (wet)	+2
Severely slippery (icy)	+5
Slightly sloped (under 45 deg)	+2
Severely sloped (over 45 deg)	+5
Slightly unsteady (boat in rough water)	+2
Moderately unsteady (boat in a storm)	+5
Severely unsteady (earthquake)	+10
Move at full speed on narrow or uneven surfaces	+5*

Action

None. An Acrobatics check is made as part of another action or as a reaction to a situation.

Special

If you have 3 or more ranks in Acrobatics, you gain a +3 dodge bonus to AC when fighting defensively instead of the usual +2, and a +6 dodge bonus to AC when taking the total defense action instead of the usual +4.

If you have the Acrobatic feat, you get a bonus on Acrobatics checks (see Feats).

APPRAISE (INT)

Trained only. Armor check penalty applies.

You can evaluate the monetary value of an object.

Check

A DC 20 Appraise check determines the value of a common item. If you succeed by 5 or more, you also determine if the item has magic properties, although this success does not grant knowledge of the magic item's abilities. If you fail the check by less than 5, you determine the price of that item to within 20% of its actual value. If you fail this check by 5 or more, the price is wildly inaccurate, subject to GM discretion. Particularly rare or exotic items might increase the DC of this check by 5 or more.

You can also use this check to determine the most valuable item visible in a treasure hoard. The DC of this check is generally 20 but can increase to as high as 30 for a particularly large hoard.

Action

Appraising an item takes 1 standard action. Determining the most valuable object in a treasure hoard takes 1 full-round action.

Try Again

Additional attempts to Appraise an item reveal the same result.

Special

A spellcaster with a raven familiar gains a +3 bonus on Appraise checks.

BLUFF (CHA)

Trained only. Armor check penalty applies.

You know how to tell a lie.

Check

Bluff is an opposed skill check against your opponent’s Sense Motive skill. If you use Bluff to fool someone, with a successful check you convince your opponent that what you are saying is true. Bluff checks are modified depending upon the believability of the lie. The following modifiers are applied to the roll of the creature attempting to tell the lie. Note that some lies are so improbable that it is impossible to convince anyone that they are true (subject to GM discretion).

CIRCUMSTANCES	BLUFF MODIFIER
The target wants to believe you	+5
The lie is believable	+0
The lie is unlikely	-5
The lie is far-fetched	-10
The lie is impossible	-20
The target is drunk or impaired	+5
You possess convincing proof	up to +10

Feint

You can use Bluff to feint in combat, causing your opponent to be denied his Dexterity bonus to his AC against your next attack. The DC of this check is equal to 10 + your opponent’s base attack bonus + your opponent’s Wisdom modifier. If your opponent is trained in Sense Motive, the DC is instead equal to 10 + your opponent’s Sense Motive bonus, if higher. For more information on feinting in combat, see Combat.

Secret Messages

You can use Bluff to pass hidden messages along to another character without others understanding your true meaning by using innuendo to cloak your actual message. The DC of this check is 15 for simple messages and 20 for complex messages. If you are successful, the target automatically understands you, assuming you are communicating in a language that it understands. If your check fails by 5 or more, you deliver the wrong message. Other creatures that receive the message can decipher it by succeeding at an opposed Sense Motive check against your Bluff result.

Action

Attempting to deceive someone takes at least 1 round, but can possibly take longer if the lie is elaborate (as determined by the GM on a case-by-case basis).

Feinting in combat is a standard action.

Using Bluff to deliver a secret message takes twice as long as the message would otherwise take to relay.

Try Again

If you fail to deceive someone, further attempts to deceive them are at a -10 penalty and may be impossible (GM discretion).

You can attempt to feint against someone again if you fail. Secret messages can be relayed again if the first attempt fails.

Special

A spellcaster with a viper familiar gains a +3 bonus on Bluff checks.

If you have the Deceitful feat, you get a bonus on Bluff checks (see Feats).

CLIMB (STR)

Trained only. Armor check penalty applies.

You are skilled at scaling vertical surfaces, from smooth city walls to rocky cliffs.

Check

With a successful Climb check, you can advance up, down, or across a slope, wall, or other steep incline (or even across a ceiling, provided it has handholds) at one-quarter your normal speed. A slope is considered to be any incline at an angle measuring less than 60 degrees; a wall is any incline at an angle measuring 60 degrees or more.

A Climb check that fails by 4 or less means that you make no progress, and one that fails by 5 or more means that you fall from whatever height you have already attained.

The DC of the check depends on the conditions of the climb. Compare the task with those on the following table to determine an appropriate DC.

CLIMB DC	EXAMPLE SURFACE OR ACTIVITY
0	A slope too steep to walk up, or a knotted rope with a wall to brace against.
5	A rope with a wall to brace against, or a knotted rope, or a rope affected by the rope trick spell.
10	A surface with ledges to hold on to and stand on, such as a very rough wall or a ship's rigging.
15	Any surface with adequate handholds and footholds (natural or artificial), such as a very rough natural rock surface or a tree, or an unknotted rope, or pulling yourself up when dangling by your hands.
20	An uneven surface with narrow handholds and footholds, such as a typical wall in a dungeon.
25	A rough surface, such as a natural rock wall or a brick wall.
30	An overhang or ceiling with handholds only.
-	A perfectly smooth, flat vertical (or inverted) surface cannot be climbed.
Climb DC Modifier*	Example Surface or Activity
-10	Climbing a chimney (artificial or natural) or other location where you can brace against two opposite walls.
-5	Climbing a corner where you can brace against perpendicular walls.
+5	Surface is slippery.

You need both hands free to climb, but you may cling to a wall with one hand while you cast a spell or take some other action that requires only one hand. While climbing, you can't move to avoid a blow, so you lose your Dexterity bonus to AC (if any). You also can't use a shield while climbing. Anytime you take damage while climbing, make a Climb check against the DC of the slope or wall. Failure means you fall from your current height and sustain the appropriate falling damage.

Accelerated Climbing

You try to climb more quickly than normal. By accepting a -5 penalty, you can move half your speed (instead of one-quarter your speed).

Make Your Own Handholds and Footholds

You can make your own handholds and footholds by pounding pitons into a wall. Doing so takes 1 minute per piton, and one piton is needed per 5 feet of distance. As with any surface that offers handholds and footholds, a wall with pitons in it has a DC of 15. In the same way, a climber with a handaxe or similar implement can cut handholds in an ice wall.

Catch Yourself When Falling

It's practically impossible to catch yourself on a wall while falling, yet if you wish to attempt such a difficult task, you can make a Climb check (DC = wall's DC + 20) to do so. It's much easier to catch yourself on a slope (DC = slope's DC + 10).

Catch a Falling Character While Climbing

If someone climbing above you or adjacent to you falls, you can attempt to catch the falling character if he or she is within your reach. Doing so requires a successful melee touch attack against the falling character (though he or she can voluntarily forego any Dexterity bonus to AC if desired). If you hit, you must immediately attempt a Climb check (DC = wall's DC + 10). Success indicates that you catch the falling character, but his total weight, including equipment, cannot exceed your heavy load limit or you automatically fall. If you fail your Climb check by 4 or less, you fail to stop the character's fall but don't lose your grip on the wall. If you fail by 5 or more, you fail to stop the character's fall and begin falling as well.

Action

Climbing is part of movement, so it's generally part of a move action (and may be combined with other types of movement in a move action). Each move action that includes any climbing requires a separate Climb check. Catching yourself or another falling character doesn't take an action.

Special

You can use a rope to haul a character upward (or lower a character) through sheer strength. You can lift double your maximum load in this manner.

A creature with a climb speed has a +8 racial bonus on all Climb checks. The creature must make a Climb check to climb any wall or slope with a DC higher than 0, but it can always choose to take 10, even if rushed or threatened while climbing. If a creature with a climb speed chooses an accelerated climb (see above), it moves at double its climb speed (or at its land speed, whichever is slower) and makes a single Climb check at a -5 penalty. Such a creature retains its Dexterity bonus to Armor Class (if any) while climbing, and opponents get no special bonus to their attacks against it. It cannot, however, use the run action while climbing.

If you have the Athletic feat, you get a bonus on Climb checks (see Feats).

CRAFT (INT)

Trained only. Armor check penalty applies.

You are skilled in the creation of a specific group of items, such as armor or weapons. Like Knowledge, Perform, and Profession, Craft is actually a number of separate skills. You could have several Craft skills, each with its own ranks. The most common Craft skills are alchemy, armor, baskets, books, bows, calligraphy, carpentry, cloth, clothing, glass, jewelry, leather, locks, paintings, pottery, sculptures, ships, shoes, stonemasonry, traps, and weapons. A Craft skill is specifically focused on creating something. If nothing is created by the endeavor, it probably falls under the heading of a Profession skill.

Check

You can practice your trade and make a decent living, earning half your check result in gold pieces per week of dedicated work. You know how to use the tools of your trade, how to perform the craft's daily tasks, how to supervise untrained helpers, and how to handle common problems. (Untrained laborers and assistants earn an average of 1 silver piece per day.)

The basic function of the Craft skill, however, is to allow you to make an item of the appropriate type. The DC depends on the complexity of the item to be created. The DC, your check result, and the price of the item determine how long it takes to make a particular item. The item's finished price also determines the cost of raw materials.

In some cases, the fabricate spell can be used to achieve the results of a Craft check with no actual check involved. You must still make an appropriate Craft check when using the spell to make articles requiring a high degree of craftsmanship.

A successful Craft check related to woodworking in conjunction with the casting of the ironwood spell enables you to make wooden items that have the strength of steel.

When casting the spell minor creation, you must succeed on an appropriate Craft check to make a complex item.

All crafts require artisan's tools to give the best chance of success. If improvised tools are used, the check is made with a -2 penalty. On the other hand, masterwork artisan's tools provide a +2 circumstance bonus on the check.

To determine how much time and money it takes to make an item, follow these steps.

- 1 Find the item's price in silver pieces (1 gp = 10 sp).
- 2 Find the item's DC from Table: Craft Skills.
- 3 Pay 1/3 of the item's price for the raw material cost.

Make an appropriate Craft check representing one week's worth of work. If the check succeeds, multiply your check result by the DC. If the result times the DC equals the price of the item in sp, then you have completed the item. (If the result times the DC equals double or triple the price of the item in silver pieces, then you've completed the task in one-half or one-third of the time. Other multiples of the DC reduce the time in the same manner.) If the result times the DC doesn't equal the price, then it represents the progress you've made this week. Record the result and make a new Craft check for the next week. Each week, you make more progress until your total reaches the price of the item in silver pieces.

If you fail a check by 4 or less, you make no progress this week. If you fail by 5 or more, you ruin half the raw materials and have to pay half the original raw material cost again.

Progress by the Day

You can make checks by the day instead of by the week. In this case your progress (check result times DC) should be divided by the number of days in a week.

Create Masterwork Items

You can make a masterwork item: a weapon, suit of armor, shield, or tool that conveys a bonus on its use through its exceptional craftsmanship. To create a masterwork item, you create the masterwork component as if it were a separate item in addition to the standard item. The masterwork component has its own price (300 gp for a weapon or 150 gp for a suit of armor or a shield, see Equipment for the price of other masterwork tools) and a Craft DC of 20. Once both the standard component and the masterwork component are completed, the masterwork item is finished. The cost you pay for the masterwork component is one-third of the given amount, just as it is for the cost in raw materials.

Repair Items

You can repair an item by making checks against the same DC that it took to make the item in the first place. The cost of repairing an item is one-fifth of the item's price.

ITEM CRAFT	SKILL	CRAFT DC
Acid	Alchemy	15
Alchemist's fire, smokestick, or tindertwig	Alchemy	20
Antitoxin, sunrod, tanglefoot bag, or thunderstone	Alchemy	25
Armor or shield	Armor	10 + AC bonus
Longbow, shortbow, or arrows	Bows	12
Composite longbow or composite shortbow	Bows	15
Composite longbow or composite shortbow with high strength rating	Bows	15 + (2 x rating)
Mechanical trap	Traps	Varies*
Crossbow, or bolts	Weapons	15
Simple melee or thrown weapon	Weapons	12
Martial melee or thrown weapon	Weapons	15
Exotic melee or thrown weapon	Weapons	18
Very simple item (wooden spoon)	Varies	5
Typical item (iron pot)	Varies	10
High-quality item (bell)	Varies	15
Complex or superior item (lock)	Varies	20

Action

Does not apply. Craft checks are made by the day or week (see above).

Try Again

Yes, but each time you fail by 5 or more, you ruin half the raw materials and have to pay half the original raw material cost again.

Special

You may voluntarily add +10 to the indicated DC to craft an item. This allows you to create the item more quickly (since you'll be multiplying this higher DC by your Craft check result to determine progress). You must decide whether to increase the DC before you make each weekly or daily check.

To make an item using Craft (alchemy), you must have alchemical equipment. If you are working in a city, you can buy what you need as part of the raw materials cost to make the item, but alchemical equipment is difficult or impossible to come by in some places. Purchasing and maintaining an alchemist's lab grants a +2 circumstance bonus on Craft (alchemy) checks because you have the perfect tools for the job, but it does not affect the cost of any items made using the skill.

A gnome receives a +2 bonus on a Craft or Profession skill of her choice.

DIPLOMACY (CHA)

Trained only. Armor check penalty applies.

You can use this skill to persuade others to agree with your arguments, to resolve differences, and to gather valuable information or rumors from people. This skill is also used to negotiate conflicts by using the proper etiquette and manners suitable to the problem.

Check

You can change the initial attitudes of nonplayer characters with a successful check. The DC of this check depends on the creature's starting attitude toward you, adjusted by its Charisma modifier. If you succeed, the character's attitude toward you is improved by one step. For every 5 by which your check result exceeds the DC, the character's attitude toward you increases by one additional step. A creature's attitude cannot be shifted more than two steps up in this way, although the GM can override this rule in some situations. If you fail the check by 4 or less, the character's attitude toward you is unchanged. If you fail by 5 or more, the character's attitude toward you is decreased by one step.

You cannot use Diplomacy against a creature that does not understand you or has an Intelligence of 3 or less. Diplomacy is generally ineffective in combat and against creatures that intend to harm you or your allies in the immediate future. Any attitude shift caused through Diplomacy generally lasts for 1d4 hours but can last much longer or shorter depending upon the situation (GM discretion).

STARTING ATTITUDE	DIPLOMACY DC
Hostile	25 + creature's Cha modifier
Unfriendly	20 + creature's Cha modifier
Indifferent	15 + creature's Cha modifier
Friendly	10 + creature's Cha modifier
Helpful	0 + creature's Cha modifier

If a creature's attitude toward you is at least indifferent, you can make requests of the creature. This is an additional Diplomacy check, using the creature's current attitude to determine the base DC, with one of the following modifiers. Once a creature's attitude has shifted to helpful, the creature gives in to most requests without a check, unless the request is against its nature or puts it in serious peril. Some requests automatically fail if the request goes against the creature's values or its nature, subject to GM discretion.

REQUEST	DIPLOMACY DC MODIFIER
Give simple advice or directions	-5
Give detailed advice	+0
Give simple aid	+0
Reveal an unimportant secret	+5
Give lengthy or complicated aid	+5
Give dangerous aid	+10
Reveal an important secret	+10 or more
Give aid that could result in punishment	+15 or more
Additional requests	+5 per request

Gather Information

You can also use Diplomacy to gather information about a specific topic or individual. To do this, you must spend at least 1d4 hours canvassing people at local taverns, markets, and gathering places. The DC of this check depends on the obscurity of the information sought, but for most commonly known facts or rumors it is 10. For obscure or secret knowledge, the DC might increase to 20 or higher. The GM might rule that some topics are simply unknown to common folk.

Action

Using Diplomacy to influence a creature's attitude takes 1 minute of continuous interaction. Making a request of a creature takes 1 or more rounds of interaction, depending upon the complexity of the request. Using Diplomacy to gather information takes 1d4 hours of work searching for rumors and informants.

Try Again

You cannot use Diplomacy to influence a given creature's attitude more than once in a 24-hour period. If a request is refused, the result does not change with additional checks, although other requests might be made. You can retry Diplomacy checks made to gather information.

Special

If you have the Persuasive feat, you gain a bonus on Diplomacy checks (see Feats).

DISABLE DEVICE (DEX)

Trained only. Armor check penalty applies.

You are skilled at disarming traps and opening locks. In addition, this skill lets you sabotage simple mechanical devices, such as catapults, wagon wheels, and doors.

Check

When disarming a trap or other device, the Disable Device check is made secretly, so that you don't necessarily know whether you've succeeded.

The DC depends on how tricky the device is. If the check succeeds, you disable the device. If it fails by 4 or less, you have failed but can try again. If you fail by 5 or more, something goes wrong. If the device is a trap, you trigger it. If you're attempting some sort of sabotage, you think the device is disabled, but it still works normally.

You also can rig simple devices such as saddles or wagon wheels to work normally for a while and then fail or fall off some time later (usually after 1d4 rounds or minutes of use).

DEVICE	TIME	DISABLE DEVICE DC*	EXAMPLE
Simple	1 round	10	Jam a lock
Tricky	1d4 rounds	15	Sabotage a wagon wheel
Difficult	2d4 rounds	20	Disarm a trap, reset a trap
Extreme	2d4 rounds	25	Disarm a complex trap, cleverly sabotage a clockwork device
Lock Quality	Disable Device DC		
—	—		
Simple	20		
Average	25		
Good	30		
Superior	40		

Open Locks

The DC for opening a lock depends on its quality. If you do not have a set of thieves' tools, these DCs increase by 10.

Action

The amount of time needed to make a Disable Device check depends on the task, as noted above. Disabling a simple device takes 1 round and is a full-round action. A tricky or difficult device requires 1d4 or 2d4 rounds. Attempting to open a lock is a full-round action.

Try Again

Varies. You can retry checks made to disable traps if you miss the check by 4 or less. You can retry checks made to open locks.

Special

If you have the Deft Hands feat, you get a bonus on Disable Device checks (see Feats).

A rogue who beats a trap's DC by 10 or more can study the trap, figure out how it works, and bypass it without disarming it. A rogue can rig a trap so her allies can bypass it as well.

Restriction

Characters with the trapfinding ability (like rogues) can disarm magic traps. A magic trap generally has a DC of 25 + the level of the spell used to create it.

The spells fire trap, glyph of warding, symbol, and teleportation circle also create traps that a rogue can disarm with a successful Disable Device check. Spike growth and spike stones, however, create magic hazards against which Disable Device checks do not succeed. See the individual spell descriptions for details.

DISGUISE (CHA)

Trained only. Armor check penalty applies.

You are skilled at changing your appearance.

Check

Your Disguise check result determines how good the disguise is, and it is opposed by others’ Perception check results. If you don’t draw any attention to yourself, others do not get to make Perception checks. If you come to the attention of people who are suspicious (such as a guard who is watching commoners walking through a city gate), it can be assumed that such observers are taking 10 on their Perception checks.

You get only one Disguise check per use of the skill, even if several people make Perception checks against it. The Disguise check is made secretly, so that you can’t be sure how good the result is.

The effectiveness of your disguise depends on how much you’re changing your appearance. Disguise can be used to make yourself appear like a creature that is one size category larger or smaller than your actual size. This does not change your actual size or reach, should you enter combat while wearing such a disguise.

DISGUISE	CHECK MODIFIER
Minor details only	+5
Disguised as different gender	-2
Disguised as different race	-2
Disguised as different age category	-2 per step
Disguised as different size category	-10
Familiarity	Viewer’s Perception Check Bonus
—	—
Recognizes on sight	+4
Friends or associates	+6
Close friends	+8
Intimate	+10

If you are impersonating a particular individual, those who know what that person looks like get a bonus on their Perception checks according to the table above. Furthermore, they are automatically considered to be suspicious of you, so opposed checks are always called for.

An individual makes a Perception check to see through your disguise immediately upon meeting you and again every hour thereafter. If you casually meet a large number of different creatures, each for a short time, check once per day or hour, using an average Perception modifier for the group.

Action

Creating a disguise requires 1d3 x 10 minutes of work. Using magic (such as the disguise self spell) reduces this action to the time required to cast the spell or trigger the effect.

Try Again

Yes. You may try to redo a failed disguise, but once others know that a disguise was attempted, they'll be more suspicious.

Special

Magic that alters your form, such as alter self, disguise self, polymorph, or shapechange, grants you a +10 bonus on Disguise checks (see the individual spell descriptions). Divination magic that allows people to see through illusions (such as true seeing) does not penetrate a mundane disguise, but it can negate the magical component of a magically enhanced one.

You must make a Disguise check when you cast a simulacrum spell to determine how good the likeness is.

If you have the Deceitful feat, you gain a bonus on Disguise checks (see Feats).

ESCAPE ARTIST (DEX)

Trained only. Armor check penalty applies.

Your training allows you to slip out of bonds and escape from grapples.

Check

The table below gives the DCs needed to escape various forms of restraints.

Ropes

The DC of your Escape Artist check is equal to the binder's Combat Maneuver Bonus +20.

Manacles and Masterwork Manacles

The DC for manacles is set by their construction (see the table below).

Tight Space

The DC noted is for getting through a space through which your head fits but your shoulders don't. If the space is long, you may need to make multiple checks. You can't squeeze through a space that your head does not fit through.

Grappler

You can make an Escape Artist check in place of a combat maneuver check to escape a grapple (see Combat) or a pin.

RESTRAINT	ESCAPE ARTIST DC
Rope/bindings	Binder's CMB +20
Net, animate rope, command plants, control plants, or entangle	20
Snare spell	23
Manacles	30
Tight space	30
Masterwork manacles	35
Grappler	Grappler's CMD

Action

Making an Escape Artist check to escape from rope bindings, manacles, or other restraints (except a grappler) requires 1 minute of work. Escaping from a net or an animate rope, command plants, control plants, or entangle spell is a full-round action. Escaping from a grapple or pin is a standard action. Squeezing through a tight space takes at least 1 minute, maybe longer, depending on how long the space is.

Try Again

Varies. You can make another check after a failed check if you're squeezing your way through a tight space, making multiple checks. If the situation permits, you can make additional checks, or even take 20, as long as you're not being actively opposed. If the DC to escape from rope or bindings is higher than 20 + your Escape Artist skill bonus, you cannot escape from the bonds using Escape Artist.

Special

If you have the Stealthy feat, you gain a bonus on Escape Artist checks (see Feats).

FLY (DEX)

Trained only. Armor check penalty applies.

You are skilled at flying, through either the use of wings or magic, and can perform daring or complex maneuvers while airborne. Note that this skill does not give you the ability to fly.

Check

You generally need only make a Fly check when you are attempting a complex maneuver. Without making a check, a flying creature can remain flying at the end of its turn so long as it moves a distance greater than half its speed. It can also turn up to 45 degrees by sacrificing 5 feet of movement, can rise at half speed at an angle of 45 degrees, and can descend at any angle at normal speed. Note that these restrictions only apply to movement taken during your current turn. At the beginning of the next turn, you can move in a different direction than you did the previous turn without making a check. Taking any action that violates these rules requires a Fly check. The difficulty of these maneuvers varies depending upon the maneuver you are attempting, as noted on the following chart.

FLYING MANEUVER	FLY DC
Move less than half speed and remain flying	10
Hover	15
Turn greater than 45 deg by spending 5 feet of movement	15
Turn 180 deg by spending 10 feet of movement	20
Fly up at greater than 45 deg angle	20

Attacked While Flying

You are not considered flat-footed while flying. If you are flying using wings and you take damage while flying, you must make a DC 10 Fly check to avoid losing 10 feet of altitude. This descent does not provoke an attack of opportunity and does not count against a creature's movement.

Collision While Flying

If you are using wings to fly and you collide with an object equal to your size or larger, you must immediately make a DC 25 Fly check to avoid plummeting to the ground, taking the appropriate falling damage.

Avoid Falling Damage

If you are falling and have the ability to fly, you can make a DC 10 Fly check to negate the damage. You cannot make this check if you are falling due to a failed Fly check or a collision.

High Wind Speeds

Flying in high winds adds penalties on your Fly checks as noted on Table: Wind Effects on Flight. "Checked" means that creatures of that size or smaller must succeed on a DC 20 Fly check to move at all so long as the wind persists. "Blown away" means that creatures of that size or smaller must make a DC 25 Fly check or be blown back 2d6 x 10 feet and take 2d6 points of nonlethal damage. This check must be made every round the creature remains airborne. A creature that is blown away must still make a DC 20 Fly check to move due to also being checked.

WIND FORCE	WIND SPEED	CHECKED SIZE	BLOWN AWAY SIZE	FLY PENALTY
Light	0-10 mph	-	-	-
Moderate	11-20 mph	-	-	-
Strong	21-30 mph	Tiny	-	-2
Severe	31-50 mph	Small	Tiny	-4
Windstorm	51-74 mph	Medium	Small	-8
Hurricane	75-174 mph	Large	Medium	-12
Tornado	175+ mph	Huge	Large	-16

Action

None. A Fly check doesn't require an action; it is made as part of another action or as a reaction to a situation.

Try Again

Varies. You can attempt a Fly check to perform the same maneuver on subsequent rounds. If you are using wings and you fail a Fly check by 5 or more, you plummet to the ground, taking the appropriate falling damage (see Environment).

Special

A spellcaster with a bat familiar gains a +3 bonus on Fly checks.

Creatures with a fly speed treat the Fly skill as a class skill. A creature with a natural fly speed receives a bonus (or penalty) on Fly skill checks depending on its maneuverability: Clumsy -8, Poor -4, Average +0, Good +4, Perfect +8. Creatures without a listed maneuverability rating are assumed to have average maneuverability.

A creature larger or smaller than Medium takes a size bonus or penalty on Fly checks depending on its size category: Fine +8, Diminutive +6, Tiny +4, Small +2, Large -2, Huge -4, Gargantuan -6, Colossal -8.

You cannot take ranks in this skill without a natural means of flight or gliding. Creatures can also take ranks in Fly if they possess a reliable means of flying every day (either through a spell or other special ability).

If you have the Acrobatic feat, you get a bonus on Fly checks (see Feats).

HANDLE ANIMAL (CHA)

Trained only. Armor check penalty applies.

You are trained at working with animals, and can teach them tricks, get them to follow your simple commands, or even domesticate them.

Check

The DC depends on what you are trying to do.

TASK	HANDLE ANIMAL DC
Handle an animal	10
"Push" an animal	25
Teach an animal a trick	15 or 20*
Train an animal for a general purpose	15 or 20*
Rear a wild animal	15 + HD of animal

Handle an Animal

This task involves commanding an animal to perform a task or trick that it knows. If the animal is wounded or has taken any nonlethal damage or ability score damage, the DC increases by 2. If your check succeeds, the animal performs the task or trick on its next action.

"Push" an Animal: To push an animal means to get it to perform a task or trick that it doesn't know but is physically capable of performing. This category also covers making an animal perform a forced march or forcing it to hustle for more than 1 hour between sleep cycles. If the animal is wounded or has taken any nonlethal damage or ability score damage, the DC increases by 2. If your check succeeds, the animal performs the task or trick on its next action.

Teach an Animal a Trick

You can teach an animal a specific trick with 1 week of work and a successful Handle Animal check against the indicated DC. An animal with an Intelligence score of 1 can learn a maximum of three tricks, while an animal with an Intelligence score of 2 can learn a maximum of six tricks. Possible tricks (and their associated DCs) include, but are not necessarily limited to, the following: Attack (DC 20), Come (DC 15), Defend (DC 20), Down (DC 15), Fetch (DC 15), Guard (DC 20), Heel (DC 15), Perform (DC 15), Seek (DC 15), Stay (DC 15), Track (DC 20), Work (DC 15).

Train an Animal for a General Purpose

Rather than teaching an animal individual tricks, you can simply train it for a general purpose. Essentially, an animal's purpose represents a preselected set of known tricks that fit into a common scheme, such as guarding or heavy labor. The animal must meet all the normal prerequisites for all tricks included in the training package. If the package includes more than three tricks, the animal must have an Intelligence score of 2 or higher.

An animal can be trained for only one general purpose, though if the creature is capable of learning additional tricks (above and beyond those included in its general purpose), it may do so. Training an animal for a purpose requires fewer checks than teaching individual tricks does, but no less time: Combat Training (DC 20, 6 weeks), Fighting (DC 20, 3 weeks), Guarding (DC 20, 4 weeks), Heavy Labor (DC 15, 2 weeks), Hunting (DC 20, 6 weeks), Performance (DC 15, 5 weeks), Riding (DC 15, 3 weeks).

Rear a Wild Animal

To rear an animal means to raise a wild creature from infancy so that it becomes domesticated. A handler can rear as many as three creatures of the same kind at once.

A successfully domesticated animal can be taught tricks at the same time it's being raised, or it can be taught as a domesticated animal later.

Action

Varies. Handling an animal is a move action, while “pushing” an animal is a full-round action. (A druid or ranger can handle an animal companion as a free action or push it as a move action.) For tasks with specific time frames noted above, you must spend half this time (at the rate of 3 hours per day per animal being handled) working toward completion of the task before you attempt the Handle Animal check. If the check fails, your attempt to teach, rear, or train the animal fails and you need not complete the teaching, rearing, or training time. If the check succeeds, you must invest the remainder of the time to complete the teaching, rearing, or training. If the time is interrupted or the task is not followed through to completion, the attempt to teach, rear, or train the animal automatically fails.

Try Again

Yes, except for rearing an animal.

Special

You can use this skill on a creature with an Intelligence score of 1 or 2 that is not an animal, but the DC of any such check increases by 5. Such creatures have the same limit on tricks known as animals do.

A druid or ranger gains a +4 circumstance bonus on Handle Animal checks involving an animal companion.

In addition, a druid’s or ranger’s animal companion knows one or more bonus tricks, which don’t count against the normal limit on tricks known and don’t require any training time or Handle Animal checks to teach.

If you have the Animal Affinity feat, you get a bonus on Handle Animal checks (see Feats).

Untrained

If you have no ranks in Handle Animal, you can use a Charisma check to handle and push domestic animals, but you can’t teach, rear, or train animals. A druid or ranger with no ranks in Handle Animal can use a Charisma check to handle and push her animal companion, but she can’t teach, rear, or train other nondomestic animals.

HEAL (WIS)

Trained only. Armor check penalty applies.

You are skilled at tending to wounds and ailments.

Check

The DC and effect of a Heal check depend on the task you attempt.

TASK	DC
First aid	15
Long-term care	15
Treat wounds from caltrops, spike growth, or spike stones	15
Treat deadly wounds	20
Treat poison	Poison's save DC
Treat disease	Disease's save DC

First Aid

You usually use first aid to save a dying character. If a character has negative hit points and is losing hit points (at the rate of 1 per round, 1 per hour, or 1 per day), you can make him stable. A stable character regains no hit points but stops losing them. First aid also stops a character from losing hit points due to effects that cause bleed (see Conditions for rules on bleed damage).

Long-Term Care

Providing long-term care means treating a wounded person for a day or more. If your Heal check is successful, the patient recovers hit points or ability score points lost to ability damage at twice the normal rate: 2 hit points per level for a full 8 hours of rest in a day, or 4 hit points per level for each full day of complete rest; 2 ability score points for a full 8 hours of rest in a day, or 4 ability score points for each full day of complete rest.

You can tend to as many as six patients at a time. You need a few items and supplies (bandages, salves, and so on) that are easy to come by in settled lands. Giving long-term care counts as light activity for the healer. You cannot give long-term care to yourself.

Treat Wounds from Caltrops, Spike Growth, or Spike Stones

A creature wounded by stepping on a caltrop moves at half normal speed. A successful Heal check removes this movement penalty.

A creature wounded by a spike growth or spike stones spell must succeed on a Reflex save or take injuries that reduce his speed by one-third. Another character can remove this penalty by taking 10 minutes to dress the victim's injuries and succeeding on a Heal check against the spell's save DC.

Treat Deadly Wounds

When treating deadly wounds, you can restore hit points to a damaged creature. Treating deadly wounds restores 1 hit point per level of the creature. If you exceed the DC by 5 or more, add your Wisdom modifier (if positive) to this amount. A creature can only benefit from its deadly wounds being treated within 24 hours of being injured and never more than once per day. You must expend two uses from a healer's kit to perform this task. You take a -2 penalty on your Heal skill check for each use from the healer's kit that you lack.

Treat Poison

To treat poison means to tend to a single character who has been poisoned and who is going to take more damage from the poison (or suffer some other effect). Every time the poisoned character makes a saving throw against the poison, you make a Heal check. If your Heal check exceeds the DC of the poison, the character receives a +4 competence bonus on his saving throw against the poison.

Treat Disease

To treat a disease means to tend to a single diseased character. Every time the diseased character makes a saving throw against disease effects, you make a Heal check. If your Heal check exceeds the DC of the disease, the character receives a +4 competence bonus on his saving throw against the disease.

Action

Providing first aid, treating a wound, or treating poison is a standard action. Treating a disease or tending a creature wounded by a spike growth or spike stones spell takes 10 minutes of work. Treating deadly wounds takes 1 hour of work. Providing long-term care requires 8 hours of light activity.

Try Again

Varies. Generally speaking, you can't try a Heal check again without witnessing proof of the original check's failure. You can always retry a check to provide first aid, assuming the target of the previous attempt is still alive.

Special

A character with the Self-Sufficient feat gets a bonus on Heal checks (see Feats).

A healer's kit gives you a +2 circumstance bonus on Heal checks.

INTIMIDATE (CHA)

Trained only. Armor check penalty applies.

You can use this skill to frighten an opponent or to get them to act in a way that benefits you. This skill includes verbal threats and displays of prowess.

Check

You can use Intimidate to force an opponent to act friendly toward you for 1d6 x 10 minutes with a successful check. The DC of this check is equal to 10 + the target's Hit Dice + the target's Wisdom modifier. If successful, the target gives you the information you desire, takes actions that do not endanger it, or otherwise offers limited assistance. After the Intimidate expires, the target treats you as unfriendly and may report you to local authorities. If you fail this check by 5 or more, the target attempts to deceive you or otherwise hinder your activities.

Demoralize

You can use this skill to cause an opponent to become shaken for a number of rounds. The DC of this check is equal to 10 + the target's Hit Dice + the target's Wisdom modifier. If you are successful, the target is shaken for 1 round. This duration increases by 1 round for every 5 by which you beat the DC. You can only threaten an opponent in this way if they are within 30 feet and can clearly see and hear you. Using demoralize on the same creature only extends the duration; it does not create a stronger fear condition.

Action

Using Intimidate to change an opponent's attitude requires 1 minute of conversation. Demoralizing an opponent is a standard action.

Try Again

You can attempt to Intimidate an opponent again, but each additional check increases the DC by +5. This increase resets after 1 hour has passed.

Special

You also gain a +4 bonus on Intimidate checks if you are larger than your target and a -4 penalty on Intimidate checks if you are smaller than your target.

If you have the Persuasive feat, you get a bonus on Intimidate checks (see Feats).

A half-orc gets a +2 bonus on Intimidate checks.

Skill descriptions continue in [Skills \(Knowledge-Use Magic Device\)](#).
