Before You Begin

HOW TO PLAY IN 5 MINUTES

Planet Mongo is a global conquest game set within the Flash Gordon universe. Flash Gordon and the planet of Mongo provide an interesting public domain IP to use.

★ READ THIS FIRST — THE CORE LOOP

- 1. Pick your initiative.** Pay to place council members on the initiative matrix — choosing Attack, Build, Trade, or Defend priorities for the round.
- 2. Place orders secretly.** Give each tile with units a face-down order token (Defend, Disrupt, Move, or Bolster). All orders are revealed simultaneously.
- 3. Resolve orders by initiative.** Take turns resolving one order at a time — moving units, harvesting commodities, building structures, or disrupting neighbours.
- 4. Fight for contested tiles.** Any tile with multiple factions resolves combat using the fight board — with hidden stacks, retreats, and combat zones.
- 5. Take actions.** Draw events, vote in council, trade at the central market, earn rewards, and bid for Doctor Zarkov.

DESIGN OBJECTIVES

Combine and improve upon elements from Twilight Imperium 4th Edition and Game of Thrones: The Board Game, but more importantly provide a way for players to bluff and more actively encourage trade.

INTRODUCING PLANET MONGO

Mongo is a rogue planet that travels through our solar system under the control of its dictator, Ming the Merciless. Mongo is an inhospitable planet, with various extreme climate zones. The area around Ming’s Palace is desolate and devoid of vegetation. Dragons live in the nearby caves. Other vicious animals of Mongo include Monkey Men, Orangpoid and Urso. The oceans of Mongo are home to giant sea life, including eels, sharks, water dragons and octosaks.

What's in the Box

COMPONENTS

GAME BOARD

- ♦ Initiative Matrix
- ♦ 3 Tracks (0 to 9)
- ♦ 8 Imprinted Starting Tiles
- ♦ Central Market Prices (1 to 50)
- ♦ Central Market Imprinted Tile (in the middle of the board)
- ♦ 127 Hexagons (7 rings)

FIGHTING UNITS

UNIT	PER PLAYER	TOTAL (8 PLAYERS)
Banners	15	120
Infantry	10	80
Beasts	10	80
Artillery	10	80
Transports	3	24
Naval	5	40
Aeronautical	5	40
Leader	4	32
Hero	1	8
Total	63	504

STRUCTURAL UNITS

UNIT	PER PLAYER	TOTAL (8 PLAYERS)
Barricades	5	40
Tower	5	40
Stronghold	3	24
Titan	1	8
Farms	10	80
Mills	5	40
Masonry	5	40
Factory	3	24
Total	37	296

Units as CHIPS / COIN CAPSULES = 800 = 100 per Player

CARDS

- ♦ Innovation Cards (in development)
- ♦ Event Cards (in development)
- ♦ Hero Cards = 8

OTHER COMPONENTS

- ♦ Dice = 24 (8 X D6 + 8 X D8 + 8 X D10)
- ♦ Council Members = 2 X 8 = 16
- ♦ Doctor Zarkov
- ♦ Tiles = 127
- ♦ Coins = 2032 (16X500 + 32X100 + 64X50 + 128X25 + 256X10 + 512X5 + 1024X1)

COMMODITIES

COMMODITY	TOTAL
Ice	75
Water	200
Food	150
Wood	75
Stone	75
Metal	50
Energy	50
Gems	30

Before the First Turn

SETUP

Randomly select starting factions and who starts with Doctor Zarkov.

FACTION	HOME CITY
Magneticans	M on the map
Arborians	A on the map
Coralians	C on the map
Frigians	F on the map
Volcanians	V on the map
Tropicans	T on the map
Hawkmen	H on the map
Lionmen	L on the map

If applicable, choose which tiles surround you with faction starting tiles.

Each tile type must be placed on a specific biome hex. If less than 8 players are playing, the remaining starting tiles are placed randomly in the appropriate biomes first.

Once everyone has placed their surrounding tiles, each player is given remaining tiles to place within any of the available hexes for the corresponding biomes.

Each faction then uses their starting resources in order to buy the units and commodities that they want to start with. Some factions are also given innovation cards to start with.

Once all players are happy with their starting units and commodities, play begins.

FACTIONS

There are eight starting factions to choose from.

MAGNETICANS

- ♦ **Ruler: Ming the Merciless | Region: Magnetic Mountains**
- ♦ Wealth: #4 | Population: #8 | Military: #5 | Science: #1
- ♦ Culture: #6 | Morale: #8 | Defense: #1 | Biomes: #3
- ♦ Starting Innovations: 6 | Innovation Limit: 10 | Starting Resources: 100 + 1 Energy
- ♦ Starting Tiles: 4 Mountains, 1 Forest and 1 Volcanic | Remaining Tiles: 3 Mountains
- ♦ Objective: Reach nine morale
- ♦ VP: 3 / mountain + 3 per glacial with structure

ARBORIANS

- ♦ **Ruler: Prince Barin | Region: Forest Kingdom**
- ♦ Wealth: #7 | Population: #1 | Military: #2 | Science: #7
- ♦ Culture: #5 | Morale: #2 | Defense: #8 | Biomes: #4
- ♦ Starting Innovations: 1 | Innovation Limit: 3 | Starting Resources: 100 + 5 Energy
- ♦ Starting Tiles: 5 Forests and 1 Mountain | Remaining Tiles: 2 Forests
- ♦ Objective: Build every structure available
- ♦ VP: 4 / forest + 2 per glacial

CORALIANS

- ♦ **Ruler: Queen Undina | Region: Undersea Kingdom**
- ♦ Wealth: #1 | Population: #5 | Military: #8 | Science: #4
- ♦ Culture: #8 | Morale: #5 | Defense: #4 | Biomes: #1
- ♦ Starting Innovations: 4 | Innovation Limit: 6 | Starting Resources: 175 + 3 Energy
- ♦ Starting Tiles: 4 Oceanic and 2 Glacial | Remaining Tiles: 8 Submerged
- ♦ Objective: Be lowest or tied for on the initiative track
- ♦ VP: 4 / submerged + 2 per desert

FRIGIANS

- ♦ **Ruler: Queen Fria | Region: Ice Kingdom**
- ♦ Wealth: #5 | Population: #7 | Military: #4 | Science: #3
- ♦ Culture: #3 | Morale: #6 | Defense: #2 | Biomes: #6
- ♦ Starting Innovations: 4 | Innovation Limit: 8 | Starting Resources: 100 + 5 Energy
- ♦ Starting Tiles: 6 Glacial | Remaining Tiles: 16 Glacial
- ♦ Objective: Be the highest or tied for on the influence track
- ♦ VP: 2 / glacial

VOLCANIANS

- ♦ **Ruler: Desert Hawk | Region: Firelands**
- ♦ Wealth: #2 | Population: #6 | Military: #7 | Science: #2
- ♦ Culture: #2 | Morale: #7 | Defense: #3 | Biomes: #7
- ♦ Starting Innovations: 6 | Innovation Limit: 8 | Starting Resources: 175 + 1 Energy
- ♦ Starting Tiles: 4 Volcanic and 2 Mountains | Remaining Tiles: 2 Volcanic
- ♦ Objective: Own 100 ice
- ♦ VP: 4 / volcanic + 2 per desert

TROPICANS

- ♦ **Ruler: Queen Desira | Region: Jungle Kingdom**
- ♦ Wealth: #8 | Population: #2 | Military: #3 | Science: #5
- ♦ Culture: #4 | Morale: #4 | Defense: #7 | Biomes: #5
- ♦ Starting Innovations: 2 | Innovation Limit: 6 | Starting Resources: 150 + 3 Energy
- ♦ Starting Tiles: 3 Jungle and 3 Oceanic | Remaining Tiles: 2 Jungles
- ♦ Objective: Own 50 gems
- ♦ VP: 5 / jungle + 1 per glacial

HAWKMEN

- ♦ **Ruler: Prince Vultan | Region: Sky City**
- ♦ Wealth: #8 | Population: #3 | Military: #1 | Science: #8
- ♦ Culture: #1 | Morale: #1 | Defense: #6 | Biomes: #8
- ♦ Starting Innovations: 1 | Innovation Limit: 2 | Starting Resources: 100 + 2 Energy
- ♦ Starting Tiles: 3 Mountains, 2 Water and 1 Jungle | Remaining Tiles: 36 Oceanic
- ♦ Objective: Control two tiles of each of the 8 major biomes
- ♦ VP: 1 / tile + 5 per sub + structure

LIONMEN

- ♦ **Ruler: King Jugrid | Region: Land of Lionmen**
- ♦ Wealth: #3 | Population: #4 | Military: #6 | Science: #6
- ♦ Culture: #7 | Morale: #3 | Defense: #5 | Biomes: #2
- ♦ Starting Innovations: 2 | Innovation Limit: 4 | Starting Resources: 50 + 3 Energy
- ♦ Starting Tiles: 5 Deserts and 1 Mountain | Remaining Tiles: 4 Deserts
- ♦ Objective: Control tiles that produce a total of 20 energy
- ♦ VP: 4 / desert + 2 per glacial

FACTION STATISTICS

STAT	DESCRIPTION
Wealth	Ranking refers to overall production value of region
Population	Starting position on influence track / strength of empty tiles
Military	Ranking refers to quality (or cost) of fighting units
Science	Refers to the starting cards and card limits of factions
Culture	Starting position on initiative track / starting coins
Morale	Starting position on the morale track / maximum number stacks on tile
Defense	Ranking refers to quality (or cost) of structural units
Biomes	Ranking refers to biodiversity of a region / improving range of units

TRACKS

- ♦ **Morale Track** — highest wins combat ties — only way to alter is via combat win / loss
- ♦ **Initiative Track** — determines the order of placing council members on the initiative matrix
- ♦ **Influence Track** — determines number of votes during council meetings

MORALE TRACK

0	1	2	3	4	5	6	7	8	9
	M	V	F	C	T	L	A	H	

The morale track is used to determine ties in combat. The only way to increase or decrease morale is through combat.

INITIATIVE TRACK

0	1	2	3	4	5	6	7	8	9
	C	L	M	A	T	F	V	H	

The initiative track is used to determine the order of placing council members on the initiative matrix. In the case of a tie, influence wins. If tied, morale wins. If tied, Zarkov decides.

The only way to increase or decrease initiative is through events and innovations.

INFLUENCE TRACK

0	1	2	3	4	5	6	7	8	9
	M	F	V	C	L	H	T	A	

The influence track is used to determine the order of fights in the fighting phase. It is also used to determine ties in the final round of combat if players also tie on morale. It is also used to determine the number of votes players have.

The only way to increase or decrease influence is by gaining or losing control of regions.

TRACK LIMITS

Each time a player is supposed to gain one on a track but already has nine, they are awarded with one energy instead. Each time a player is supposed to lose one on a track, but is already on zero morale, they must lose one energy instead. If they do not have energy or decide not to give-up that energy, they must instead sell commodities back to the central market at a value of twenty-five. Failing to do so results in being removed from the game.

Units

UNIT STATISTICS

UNIT	BUY	SELL	USE	BUILD	MOVE	HOLD	ATTACK	DEFEND	RANGE
Banners	0	0	0	N/A	0	0	0	0	0
Infantry	1	1	5	N/A	0	0	1	1	0
Beasts	2	1	8	N/A	1	2	2	0	1
Artillery	4	2	15	N/A	1	3	2	1	2
Transportation	8	4	20	N/A	3	10	0	1	3
Naval	10	5	14	N/A	2	5	2	3	3
Aeronautical	20	10	34	N/A	1	3	3	2	2
Hero	N/A	N/A	1	N/A	0	5	2	2	1
Leader	0	0	1	N/A	0	3	1	1	1
Barricades	5	1	0	4	0	1	0	1	0
Tower	10	5	5	9	0	3	1	2	0
Stronghold	25	10	10	18	0	10	2	3	0
Titan	50	20	20	38	1	5	3	2	2
Farm	10	5	0	9	0	1	0	0	0
Mill	15	5	5	14	0	2	0	1	0
Masonry	25	10	10	24	0	3	0	1	0
Factory	50	N/A	20	45	0	5	0	1	0

- ♦ **Buy** — how much it costs to buy unit from central market (zero is free, N/A cannot buy)
- ♦ **Sell** — how much the central market will pay to buy a unit from a player
- ♦ **Use** — cost of base materials required to use the unit
- ♦ **Build** — cost of base materials required to build unit (N/A means cannot build)
- ♦ **Move** — maximum tiles the unit can move per turn
- ♦ **Hold** — how many unit chips can be hidden beneath unit if not hidden itself
- ♦ **Attack** — attack strength value
- ♦ **Defend** — defence strength value
- ♦ **Range** — attack/defend range in tiles

BUILD / HARVEST

UNIT	PRODUCES	MAX	COST
Hero	Up to 3 units or 3 metal	1	0
Barricades	1 wood	5	25
Tower	5 coin / neighbouring faction	5	50
Stronghold	1 unit or 1 energy	3	75
Titan	1 energy	1	50
Farm	5 food / nearby farm	10	100
Mill	5 wood or convert 5 wood to 20 coin	5	75
Masonry	5 stone or convert 5 stone to 30 coin	5	125
Factory	Up to 5 units or 3 metal or convert 3 metal to 50 coin	3	150

FACTION MODIFICATIONS

Each faction has a unique unit type that is different for them.

FACTION	UNIT	BUY	SELL	USE	BUILD	MOVE	HOLD	ATTACK	DEFEND	RANGE
Magneticans	Titan	100	—	10	N/A	2	—	—	—	—
Arborians	Beasts	1	0	2	—	—	—	—	1	—
Coralians	Naval	5	0	4	—	—	10	—	—	—
Frigians	Banners	1	—	1	—	—	—	0.5	0.5	—
Volcanians	Masonry	15	15	0	—	—	—	—	3	—
Tropicans	Leader	—	—	5	—	1	5	—	2	—
Hawkmen	Stronghold	—	—	—	—	1	5	3	2	—
Lionmen	Infantry	—	1	1	—	1	1	—	—	—

PLAY SEQUENCE

Each round consists of four phases that would be completed before moving to the next.

- 1 **Initiative Phase** — pick and pay for initiative and goals for that round
 - 2 **Movement Phase** — take turns moving based on the initiative matrix
 - 3 **Fighting Phase** — resolve any fights with more than one faction on a tile
 - 4 **Action Phase** — conduct actions based on initiative and draw for events
-

DOCTOR ZARKOV

Randomly select the player who starts with Doctor Zarkov. He is used to determine ties in several different places:

- ♦ Tied (influence) for deciding fight order of tiles
 - ♦ Tied (morale then influence) for deciding outcome of the final rounds in combat
 - ♦ Tied (initiative) for blind bids for Zarkov
-

He also represents the player who is last to vote and represents the player first to play REGROUP innovation cards during the ACTION / REGROUP phase.

Blind bids are conducted for Doctor Zarkov in the REGROUP step of the ACTION phase.

BLIND BIDS

In a blind bid, players secretly choose the number of coins or commodities they want to spend and all coins and commodities used by everyone are given to the bank. The player spending the most is the winner, with ties typically determined by varying factors mentioned as required.

Phase 1

INITIATIVE PHASE

The person highest on the initiative track is the first to place their council member on the initiative matrix, where the lowest initiative with the highest slot (player closest to action) takes their turns first within the movement phase, proceeding with the next slot along (if other players within the same initiative) or down to the next lowest initiative to repeat the process.

INITIATIVE MATRIX

INITIATIVE	SLOT #4 (5/6/7P)	SLOT #3 (4P)	SLOT #2 (2/3P)	SLOT #1 (2/3P)	IMMEDIATE
1 - Attack	Pay 100	Pay 50	Pay 25	Pay 10	Relocate
2 - Build	Pay 10	Pay 25	Pay 50	Pay 100	Innovate
3 - Trade	Gain 100	Gain 50	Gain 25	Gain 10	Swindle
4 - Defend	Gain 10	Gain 25	Gain 50	Gain 100	Espionage

There are four immediate actions that players can perform when placing council members:

- ♦ **Relocate** — swap location of hero with any leader from same faction
- ♦ **Innovate** — play up-to two innovate cards
- ♦ **Swindle** — steal up-to two innovation cards (paying players 50 each)
- ♦ **Espionage** — play up-to two espionage cards (cost to play on card)

MOVEMENT PHASE

Players first give each tile with a unit a face-down order. Once all tiles with units have face-down orders placed, they can all be revealed. Players then take turns based on the initiative matrix to resolve one order at a time.

ORDERS

Orders also have a sequence based on their numbering, but only relevant to those used by that player. For example, a player cannot perform a harvest order if they still have disrupt orders that they have not yet resolved.

- 1 **Defend** — remove a disrupt order from one neighbouring tile
- 2 **Disrupt** — remove one bolster order from one neighbouring tile
- 3 **Move** — move units based on their range and available energy
- 4 **Bolster** — build or harvest from tile or units

Alternatively, instead of taking a turn to resolve an order, or if a player has no more orders to resolve — on their turn, they may / must declare that they have passed.

Additional income can be earned by those passing early with the first player passing to receive 100, the second receives 50, the third receives 25 and the fourth receives 10.

Order tokens available for each faction:

- ♦ Defend X 2
- ♦ Disrupt X 2
- ♦ Move X 2
- ♦ Bolster X 2
- ♦ Defend or Disrupt X 1 (counted as disrupt for turn sequence)
- ♦ Move or Bolster X 1 (counted as bolster for turn sequence)

DEFEND ORDERS

Players may take turns removing their defend orders in order to also remove any neighbouring disrupt orders that have been placed by other factions. If they choose not to remove opposing disrupt orders or are unable to — they instead take turns flipping those defend orders in order to signify those units have taken their turns. Additionally, any units that have unused / flipped defend orders are able to conduct special retreats if and when other factions move units into those tiles. A special retreat allows units to move to any neighbouring tile without orders.

DISRUPT ORDERS

Players may take turns removing their disrupt orders in order to also remove any neighbouring bolster orders that have been placed by other factions. If they choose not to remove opposing bolster orders or are unable to — they instead take turns flipping those disrupt orders in order to signify those units have taken their turns. Additionally, any units that have unused / flipped disrupt orders are able to tax neighbouring bolster orders. Each time a neighbouring faction uses a bolster order to produce commodities or build units, a neighbouring faction can use the relevant disrupt order to gain the same commodities / units. If there are any unused neighbouring bolster orders at the end of the movement phase, disrupt orders can be spent to gain one energy from those factions that did not choose to destroy a unit for energy.

MOVE ORDERS

The range of a unit is the maximum tiles that unit can move — regardless of energy used.

The cost of movement (in either range or energy) — with maximum movement of three tiles:

FROM \ TO	SUBMERGED	OCEANIC	VOLCANIC	GLACIAL	WOODLAND	DESERT	MOUNTAIN	JUNGLE
Submerged	0	1	3	1	2	4	3	2
Oceanic	1	0	3	1	2	4	3	2
Volcanic	3	3	0	4	2	2	1	1
Glacial	1	1	4	0	2	3	2	3
Woodland	2	2	2	2	0	3	1	1
Desert	4	4	2	3	3	0	2	1
Mountain	3	3	1	2	1	2	0	4
Jungle	2	2	1	3	1	1	4	0

Tiles can contain multiple factions. Players may move into a tile with other factions, but may not move through or out of a tile that has other units, unless those units have an unused defend order — or as part of a retreat, which usually takes place during the fighting phase.

Beasts and artillery cannot travel without being held on submerged or oceanic tiles.

Naval units can only hold units and travel without being held on submerged, oceanic and glacial tiles. Aeronautical units can treat all tiles within range as a 1 regardless of biome.

BOLSTER ORDERS

Players may take turns removing their bolster orders in order to build or harvest from the tile. Alternatively, a bolster order can be removed by a player in exchange for one energy, but they must remove one unit from that tile in order to do so. If bolster orders are not removed, players instead take turns flipping those orders to signify the end of the unit turn.

HARVESTING COMMODITIES

Bolstering allows tiles to be harvested — this includes any commodities that can be produced by units that are also on that tile. In the case of a farm, it produces 5 food per nearby tile. A nearby tile refers to any tile and all of its neighbouring tiles.

BUILDING UNITS

Bolstering allows tiles to build — this includes any unit production from the tile and (or) units on that tile. Tiles that produce units or commodities can only produce one or the other.

When paying for fighting units, the payment must be made in coins. When paying for structural units, players may pay with coins or the required commodities needed to build.

The only time commodities can be sold to the central market are:

- ♦ During the ACTION / MARKET phase
- ♦ If a player is paying for non-units (cards, spaces, etc)

Players have a limited number of available units. If a player wants to build a unit that they no longer have supply for, they can remove a unit from the board and use that instead.

FIGHTING PHASE

Fighting occurs if more than one faction occupies one tile at the end of the movement phase.

There may be more than one tile that conducts fights during the fighting phase. The order of those fights is determined by the player highest on the influence track, regardless of whether that player is involved in any of the fights or not. Tied influence is decided by Zarkov.

For each tile that is conducting a fight, we first need to establish the role of each player. If there are only two factions on the tile, the faction moving into the tile that had units is the attacker and the faction that was already on the tile is the defender. Any additional factions that were added to the tile after the attacker added theirs are all supporters.

Fighting initiative is based on roles:

- ♦ #1 — Attacker
- ♦ #2 — Supporters (ordered by order entering tile)
- ♦ #3 — Defender

RETREATS AND REVEALS

Retreats and reveals should take place in the following order:

- 1 Transfer** — All factions involved in fight transfer their hidden stacks to fight board
- 2 Blind Retreat** — Before units are revealed, players take turns to announce retreat
- 3 Reveal Units** — All factions (even retreated ones)
- 4 Revealed Retreats** — Before supporters are aligned or units are activated
- 5 Disbarment** — If all factions have retreated or all factions but one have retreated

Retreats do not take place until the end of a combat round. Performing a blind retreat costs one morale. The player retreating must give the morale to one of the remaining players left in the fight. Whereas a revealed retreat will cost the player two morale. Both blind and revealed retreats allow units to be placed in any neighbouring tiles that do not have opposing factions. If there are no neighbouring tiles available that do not already have opposing factions in them they are unable to announce retreats.

If disbarment occurs, there is no victory, winner or loser. The only losses or gains come from those that spent morale in order to retreat.

COMBAT ROUNDS

Each round of combat starts with revealed units within their relevant zones on the fight board:

- ♦ Attacker Zone — starting zone for attackers
- ♦ Defender Zone — starting zone for defenders
- ♦ Supporter Zones X 6 — starting zone for supporters (7 or 8 players)
- ♦ Supporter Zones X 4 — starting zone for supporters (5 or 6 players)
- ♦ Supporter Zones X 2 — starting zone for supporters (3 or 4 players)
- ♦ Combat Zones X 4 (starts the round empty) — 7 or 8 players
- ♦ Combat Zones X 3 (starts the round empty) — 5 or 6 players
- ♦ Combat Zones X 2 (starts the round empty) — 3 or 4 players
- ♦ Combat Zones X 1 (starts the round empty) — 2 players

In fighting initiative order, players take turns moving one of the units from their starting zone into one of the available combat zones. However, players must at all times keep one unit in their starting zone (which is activated for free if it is the only unit left in the starting zone) — otherwise once all players have moved units and (or) passed; only those units that have been placed in a combat zone are considered activated and must be paid for as moving them.

If a player only has one unit that unit is considered activated. However, if at any point during the combat rounds a player has only one unit and other players have units placed in each of the available combat zones, that unit is considered to be captured.

Combat zones should have their sequence printed on them and should be resolved as follows:

- 1 Supporters take turns moving a unit from their starting zone to attack or defend zone
- 2 Attackers roll for their combined attack score
- 3 Defenders roll for their combined defense score
- 4 Determine the difference / resolve the consequences

Once all combat zones have been resolved, return any remaining units that did not declare retreats to their starting zones and those that retreated may leave the fight board. If there are still attackers and defenders the combat must continue.

If there are only supporters that remain there is no victory, winner or loser. If there is either an attacker or a defender, but not both — there is a victory and the one of them that remains is the winner and the other is the loser. The supporters are considered neither winners nor losers.

However, any player who loses all their units from combat on the fighting board must pay each faction that has units left on the fighting board with one morale each.

ACTION PHASE

The action phase includes the following steps conducted in order:

- ♦ Events
- ♦ Voting
- ♦ Trade / Market
- ♦ Rewards
- ♦ Progress
- ♦ Regroup

IN DEVELOPMENT

Full details of the Action Phase steps (Events, Voting, Trade/Market, Rewards, Progress, Regroup) are being finalised during playtesting. The Central Market pricing system, Innovation Card effects, and Victory Conditions will be documented in supplementary materials.

The Map

TILES

There are 127 hex tiles across 9 biome types. Each tile has a population value, commodity yields, and some have special abilities. City tiles (★) are faction home territories.

Commodity key: Pop = Population, Ice, Wtr = Water, Fod = Food, Wod = Wood, Stn = Stone, Mtl = Metal, Nrg = Energy, Gem = Gems.

CENTRAL MARKET

ID	NAME	POP	ICE	WTR	FOD	WOD	STN	MTL	NRG	GEM	SPECIAL
X01	Central Market	0	0	0	0	0	0	0	0	0	Can always trade with anyone. Add two to initiative whilst in control

CITIES (8 TILES)

ID	NAME	BIOME	POP	ICE	WTR	FOD	WOD	STN	MTL	NRG	GEM	FACTION
C01	Ming's Palace	Mountain	2	1	1	0	0	4	1	2	1	Magneticans
