Welcome to the Skies

OVERVIEW

Endless Skies is a cooperative game of exploration and survival set in a vast, procedurally generated skyscape. One to four players work together to build sky-paths through three distinct biomes, manage dwindling resources, and negotiate with twelve unique factions — all before the storm front closes in.

The game combines tile-laying (building the world as you explore it) with resource management (fuel, supplies, and morale) in a cooperative framework where every player’s decisions affect the group’s survival. The sky you traverse is never the same twice: biome tiles are drawn and placed according to adjacency rules that create organic, unpredictable landscapes.

Success requires balancing exploration against conservation. Push too far too fast and you’ll exhaust your resources. Play too cautiously and the closing storm will overtake you. The best crews find the rhythm between ambition and prudence, communicating openly about what lies ahead.

What's in the Box

COMPONENTS

Content in development — rules pending playtest.

ITEM	QTY	NOTES
Biome Tiles	72	24 per biome (Cloudlands, Thermal Peaks, Open Blue).
Faction Decks	12	One deck per faction, 8 cards each.
Resource Tokens	60	Fuel (yellow), Supplies (green), Morale (blue).
Crew Pawns	4	One per player in distinct colours.
Storm Front Marker	1	Tracks the approaching storm.
Event Cards	30	Drawn at the start of each round.
Expedition Board	1	Tracks crew resources and storm progress.
Compass Die	1	D8 for wind direction during exploration.
Rulebook	1	This document.

SETUP

Content in development — rules pending playtest.

- 1 Place the Expedition Board in view of all players.
- 2 Set starting resources on the board: Fuel, Supplies, and Morale at their initial values.
- 3 Separate Biome Tiles into three face-down stacks by type.
- 4 Place the starting tile (marked with a compass rose) in the centre of the play area.
- 5 Each player places their Crew Pawn on the starting tile.
- 6 Shuffle the Event Cards and place them face-down near the board.
- 7 Place the Storm Front Marker at the beginning of the storm track.
- 8 Sort Faction Decks and keep them accessible — they enter play when their biome is revealed.

GAMEPLAY

TURN STRUCTURE

Content in development — rules pending playtest.

Endless Skies is played over a series of rounds. Each round consists of:

- 1 **Event Phase** — Draw and resolve the top Event Card. This affects all players and may advance the storm.
- 2 **Exploration Phase** — The active player draws a Biome Tile and places it adjacent to any existing tile, following adjacency rules.
- 3 **Movement Phase** — Each player may move their Crew Pawn along connected tiles, spending Fuel for each tile entered.
- 4 **Gather Phase** — Players on resource-producing tiles collect their yields.
- 5 **Faction Phase** — If any player is on a tile with an unresolved faction encounter, resolve it now.
- 6 **Storm Phase** — Advance the Storm Front Marker. Any tiles behind the storm line are removed from play.

THE THREE BIOMES

Content in development — rules pending playtest.

Each biome has unique properties that affect movement, resources, and faction encounters:

- ♦ **Cloudlands** — Dense cloud cover. Low visibility but rich in Supplies. Movement costs are reduced.
- ♦ **Thermal Peaks** — Volcanic updrafts. Dangerous but fuel-rich. Some tiles require Morale checks to enter.
- ♦ **Open Blue** — Clear sky. Fast travel but sparse resources. Ideal for long-distance movement.

FACTION ENCOUNTERS

Content in development — rules pending playtest.

Twelve factions inhabit the skies. When you land on a faction tile, draw from their deck and resolve the encounter. Factions may offer trade, request aid, or present challenges. Building relationships with factions unlocks persistent bonuses for the crew.

RESOURCE MANAGEMENT

Content in development — rules pending playtest.

Resources are shared among all players. Communication about resource levels and planned expenditures is encouraged and essential for survival.

Endgame

WINNING

Content in development — rules pending playtest.

The crew wins together or loses together. Victory is achieved by reaching the Horizon Gate — a special tile that only appears once sufficient biome tiles have been placed and at least three faction alliances have been formed.

The crew loses if:

- ♦ All resource tracks reach zero simultaneously.
- ♦ The Storm Front overtakes all remaining Crew Pawns.
- ♦ The Biome Tile stacks are exhausted before the Horizon Gate appears.

SCORING

After a successful expedition, players score based on:

- ♦ Remaining resources
- ♦ Faction alliances formed
- ♦ Tiles explored beyond the minimum
- ♦ Rounds remaining before storm overtakes

Optional Complexity

ADVANCED RULES

Content in development — rules pending playtest.

For experienced crews seeking greater challenge:

- ♦ **Solo Mode** — One player controls two Crew Pawns with a reduced Event Deck.
- ♦ **Competitive Variant** — Each player has a secret objective that may conflict with the group goal.
- ♦ **Legendary Factions** — Replace two standard faction decks with Legendary variants that have more demanding encounters and greater rewards.
- ♦ **Hurricane Season** — The storm advances at variable speed, determined by a die roll each round.

Common Questions

FAQ

Content in development — rules pending playtest.

Q: Can we play with just one player? A: Yes. The solo mode is a fully supported way to play, using two Crew Pawns controlled by one player.

Q: How long does a typical game last? A: Approximately 60 minutes. Solo games tend to run shorter (40 minutes), while 4-player games may extend slightly longer.

Q: Is there player elimination? A: No. If a player's Crew Pawn is overtaken by the storm, they are rescued by the nearest ally and continue playing from that position (with a Morale penalty).

Q: How much table space do we need? A: The tile-laying area can expand in any direction. A standard dining table provides sufficient space for most games.
