PLAYERS

# ANDERNACH CHESS

When a piece captures, it switches sides — the capturing piece becomes the opponent’s piece on the captured square. Kings are exempt from colour change.

*Andernach Chess — starting position*

SETUP

**Board:** Standard 8×8.

**Setup:** Standard chess starting position.

**FEN:** rnbqkbnr/pppppppp/8/8/8/8/PPPPPPPP/RNBQKBNR w KQkq - 0 1

## RULES

- ♦ All pieces move as in standard chess.
- ♦ When a piece captures an enemy piece, the captured piece is removed and the capturing piece changes colour (becomes the opponent's piece).
- ♦ Kings are exempt — a King that captures does NOT change colour.
- ♦ The converted piece belongs to the opponent starting from their next turn.
- ♦ Check and checkmate work normally.
- ♦ Castling and en passant follow standard rules.
- ♦ Pawns that capture on the promotion rank change colour first, then promote as the new owner's piece.

## WIN CONDITION

Checkmate (standard).

## STRATEGY

Every capture is double-edged — you remove an enemy piece but hand them the capturer. Material advantages are nearly impossible to build through captures alone. Non-capturing moves (pawn advances, positional manoeuvres) become relatively more valuable. Forks and pins have radically different implications because winning material by capture gifts the capturing piece to the opponent.

## ATTRIBUTION

Created for a chess composition event in Andernach, Germany, 1993. Public domain rules.
